

MONTANA ANGUS ASSOCIATION HISTORY PROJECT

The Montana Angus Association has reached the status it enjoys today thanks in large to the efforts of our predecessors. Those who came before us toiled tirelessly to promote the Angus breed and build an active and energetic Association from the ground up. Their passion for the breed fueled the growth and success of the Angus breed and its breeders.

As an Association we are at a point of rapid generational turn-over. We wish to honor and commemorate the work of past generations by keeping the memory of their life's work from being lost in time.

A history committee chaired by Roger Jacobs has been formed and the committee has undertaken the formidable task of documenting our important and remarkable history.

To initiate this project a form has been developed to assist members, past and present, in reporting and recording their histories. We ask that you use this as a template to collect your information. The Montana Angus Association will archive and report these histories, but this cannot be accomplished without the efforts of our individual members.

Histories will be profiled in future issues of the Montana Angus News and archived on our website. When enough information becomes available, the possibility of publishing a book will be explored.

The Association asks that you begin sending your reports straight-away. It is our collective effort that will preserve the history of our great organization. Our work today ensures future generations can gain appreciation and understanding of the rise of the Angus breed and the members of the Montana Angus Association.
