## 1<sup>ST</sup> CUT, 1 IRON Reminisce Influence Bred Heifer Sale

TUESDAY, NOVEMBER 16, 2021

Reminisce Angus Sale Barn, Dillon, MT

- 1st sort from over 1,000 head from 2 herds. Pelvic measured prior to breeding
- 400 head Aled to the American out cross standout, RM McClendon 9599
- Aled to start calving Feb 5 and March 1
- 220 head of Challis Creek home-raised heifers Aled to RM McClendon 9599
- Aled to start calving February 1.
- All heifers cleaned up with Reminsice Angus Cortachy Boy sons.
- Full Vaccination Program: Preg Guard 10, Vision 8, Virashield VL5, Valbaezon, Cleanup
- Brucellosis Free, Bangs vaccinated and bled for Brucellosis, BVD PI3 FREE, Preg checked twice
- All calves will be eligible for the Reminisce Angus Beef Program

RM McClendon 9599 is a new American out cross bull. He is a double bred calving ease sire that will splash new blood into nearly every herd in America. His Sire Dunlouise Cortachy Boy is a true calving ease, native Aberdeen Angus sire from Scotland. Nowhere in America will you find this pedigree and consistent calving ease. His maternal grandsire RM 2 Trend 3105 has been bred successfully to thousands of heifers in many herds with no difficulty. Both bulls in this pedigree produce calves with a lot of vigor at birth. Both sires are high marbling bulls as well.

The Montana Angus News is the official publication of the Montana Angus Association and is available to anyone interested in Montana's Angus cattle. However, advertising is restricted to those raising Angus cattle in the state, those consigning Angus bulls to Midland Bull Test or people servicing cattlemen with their business located in Montana.

Since the magazine is not subject to subscriptions, the only feasible way it can be mailed is at bulk rate; therefore, advertising for events scheduled within 18 days of publication will be accepted only at the advertisers risk, and this publication will assume no financial responsibility for distribution on its entire circulation prior to that time.

Finally, the information contained is from sources deemed reliable, but is not guaranteed.

For details on subscriptions and advertising please contact:

Jesse Thompson 406.450.3429 PO Box 25 • Whitlash, MT 59545 montanaangusnews@mtangus.org

Printing: Ballyhoo Printing • Lewistown, MT www.BallyhooPrinting.com Near the back of this Directory, you'll find a quote that I borrowed from the Cattle Market News Instagram page that says, "Ranching is saying,"things will slow down a bit next week," over and over again until you die." Well if that isn't an accurate representation of our lives right now then I don't know what is. As I put this directory together, we're already halfway through the summer months. Haying is being wrapped up (literally), and I'm already hearing radio and TV advertisements about going back to school.

While it's hard to see an end to summer every year, we have something to look forward to this fall. The 2021 Northern Montana Angus Tour is back after a years' hiatus and we couldn't be more excited about it! I know the North

Montana Angus Association has been busy making plans to make this a great tour. Honestly, I think we're all just excited to gather with other Angus enthusiasts while looking at top quality Angus cattle from the Rocky Mountain front range all the way to the prairies. Registration is now available through our website so head there to get signed up. All the tour details can be found in this Directory on pages 16-30.

Other Montana Angus events to look forward to this

fall are the NILE Angus events that will include the NILE Angus Heifer Futurity and the NILE Angus Female Sale October taking place on Saturday, October 23rd. Ron Frye with Ron Frye Marketing will again be the sale manager so if you've got any questions, give him a call.

I look forward to seeing everyone on the Montana Angus Tour and at the NILE. Don't forget to get signed up and make plans to attend. Safe travels and have a good rest of the summer!

Happy Trails,

Jesse Thompson Montana Angus News

Between drought fire and grasshoppers, mother nature is sure testing our resolve. Thankfully we have Angus genetics that can survive these harsh environments.

From the weird year of COVID to the summer we are all experiencing we are really looking forward to the Montana Angus Tour, hosted by the North Montana Angus Association. The Tour will be headquartered in Great Falls at the Hilton Garden Inn, from September 21st to the 23rd. What a great opportunity to catch up with old friends, meet new ones and most importantly, see outstanding Angus genetics. Please look through the entire itinerary published on page 16-30 of the 'News.

After the Tour, get ready for the Angus show and sale at the NILE. The NILE is back at the Metra this year and the Angus shows kick off with the Junior Show on October

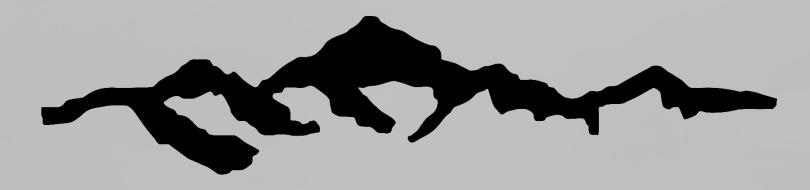

21. The Open and Futurity shows are Friday, October 22 and the event wraps up with the Angus Female sale on Saturday, the 23rd. There is a great set of Angus females consigned to the sale so I urge you all to come, look and buy. The Montana Angus Association will be hosting a social hour on Friday. Stay tuned for more details.

Finally, we head to the American Angus Association Annual Convention on November 6th to the 8th. Fort Worth is hosting again and if it is anything like the last time we were there, it will be a great time to connect with other Angus breeders from across the nation and to learn cutting edge information from our Association, which is always timely, interesting and very informative.

As always, it's a great time to be in the "Business Breed."

malekangusranch406@gmail.com • (406) 899-4360
www.MalekAngusRanch.net

We are pleased to welcome you all to the 2021 Malek Angus Ranch Tour Stop. We look forward to the opportunity to share our program and hope you spend some time evaluating the genetics we have on display. The cattle featured are a representation of the program we have worked hard to build.

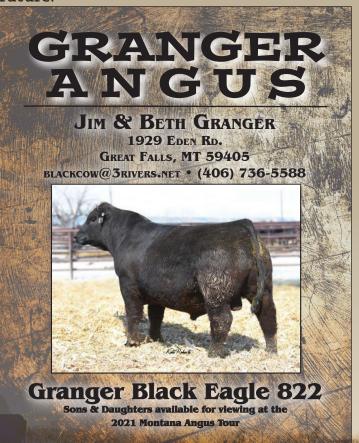

Our efforts have been concentrated on achieving the goal of providing superior performance from birth to finish. As producers who are also in the retail meat business, we realize that less days on feed is directly related to a positive bottom line. We need to balance that with providing the restaurants, families, and individual customers who rely on our product the highest quality beef available. We also demand excellent phenotype and maternal

qualities from our cow herd that are passed on to the high quality bulls we sell each year and the replacement heifers we keep to improve our herd.

The Malek Angus herd is based on S
Chisum 6175, who can be found in all the
pedigrees of the Erica cow. The Erica cows
are the foundation of our entire operation
with outstanding phenotype, performance,
and longevity. Two of our resident herd
sires, PA Fortitude and Sydgen Fate have
been used extensively on the Erica females.
This combination has exceeded our goals
and the calves consistently work their way
to the top of every calf crop.

Our annual bull sale is held each year on the third Thursday in March. We sell a few private treaty females throughout the year and have had the opportunity to consign to a select few Angus sales across the country.

We thank you for attending the 2021 Montana Angus Tour and appreciate all our friends, team members, customers and associates who have been part of our program. Please let us know if you have any questions about our cattle or program - we look forward to working with you in the future.

SEPTEMBER 21<sup>ST</sup>-23<sup>RD</sup>, 2021

Granger Angus

Jim & Beth Granger 1929 Eden Rd. Great Falls, MT 59405 blackcow@3rivers.net • (406) 736-5588 www.GrangerAngus.com

Granger Angus is located 25 miles South of Great Falls, on a North facing slope. We get a lot of snow and ample moisture. The snow piles into drifts that last through May so our cattle need to be deep and thick, big-boned and easy fleshing, as they winter in summer country with lots of wind. The nasty winter conditions give way to some of Montana's best grass land. Our cattle share this land with elk, deer, mountain lion, black bear, wolves and bobcats. This is great sharp tail grouse country.

Beth and I have enjoyed the cattle business for 44 years. In 1995, we began our registered herd from Ray Van Dykes Pride cow family. The spring of 2021 was our 27<sup>th</sup> year using embryo transfer after many other years with A.I. Like everyone, we strive to create the perfect cow for our environment using all current technology and data such as Angus GS or 50k. But in the end, choosing genetics to use phenotype is still the top priority and then that cow and that calf need to prove themselves by performing or they are out.

For over 20 years, we have marketed some of our bull calves through the Midland Bull Test. Being able to compare our bulls to 700 others from around the country has been rewarding and very educational. We have now sold bulls to buyers in 19 different states and twice been awarded Midland's World Champion Performance Pen of Three.

Treasure Test in Great Falls is another test we use and have been happy with the results from this local market. We also market around 20 yearling bulls private treaty.

On display will be sons of Granger Black Eagle 822, Sitz Resilient, Sterling Pacific, Granger Stockman LC, and various others. Also on display will be the dams of these bulls and our bred heifers, plus four one-year-old daughters from our flush from one of our donors, Pride 3039, to Southern Charm.

Our son, Forrest, and his wife, Nicole, and our granddaughter live 5 miles North and have their own cow herd. As we transition our enterprise, our herd will calve there in a much better winter environment with 2/3 the snow and half the wind. Our daughter Rachel has just moved from Bozeman, MT, to Austin, Texas.

We hope you enjoy the tour.

#### 7 Bar Heart Angus

Greg Gould & Aimee Hachigian-Gould PO Box 67 Ulm, MT 59485 mt7barheart@aol.com • (406) 866-3513 (406) 899-7227 • (406) 799-7051

The 7 Bar Heart Angus herd was established in 1986 with the purchase of females from the Apex, Westwind and Butte View herds. Other foundation cows were purchased from the Sitz, Powerline and Cedar Hills Angus Ranches in 1989. The Swanson, Holden and Sitz families supported our efforts and were generous with sharing their knowledge and advice, giving us an excellent start in the Angus business. On their tenth birthday in 2002, Andrew and Brandon obtained loans from the USDA Young Farmer Program to purchase bred heifers from Leachman Angus Ranch, adding new foundation cow families to the herd. Top end herd bulls from Leachman Angus Ranch and N Bar Land and Cattle were crossed on those cows and we

were fortunate to be mentored in our genetic selections by Les and Jay Leachman and Tom Elliott during our growing years.

Three fundamental tenets anchor the 7 Bar Heart program. First of all, we have built a strong cowherd foundation on the genetics of Emulation 31, Dynamo, Shoshone, Rito N Bar, Rito 707, Band 105, and their descendants. These bloodlines have withstood the test of time, are highly maternal and are free of the defects that have recently plagued the Angus breed. Our program operates on the theory that while the genetics of any bull are easily available through natural service or AI, the very best cows are a rare and protected commodity. Therefore, our herd bull selections have been based on the consistent performance of their elite dams and have been chosen from the sons of the very best cows from the Leachman Angus Ranch, N Bar Land and Cattle and Rollin' Rock herds. These cornerstone genetics have been stacked into multiple generations in the 7 Bar Heart herd and reflect the influence of Lass 1004, Blueblood 9532, Jannet 2576, Blackcap 1096, Erica 0025, Primrose 2424, and Revolution Rose 12. They have been crossed with the genetics of Power Play, Pine Drive Big Sky, EXT, Explorer, Frontline, Dateline, Traveler, Scotch Cap, Right Time and Black Cigar. The offspring from the cross of our current senior herd sires, Leachman Right On (by Right Time) and RR Rito Revolution 9581 (by Black Cigar, with thanks to Bill Davis and Rollin' Rock) actually number all of these foundation genetics in their pedigrees, continuing our philosophy into its 29th calf crop. In an era where 50 % of all Angus registrations are from AI sires, 20 % of all Angus registrations are from just 25 bulls and three major genetic defects have been discovered in the breed since 2008, the concentration of bloodlines in our industry is at critical point and has made it increasingly difficult to find such "clean" Angus pedigrees. We have never used any Precision 1680 or Bando 598 genetics in our herd and credit that to our insistence on using the thoroughly tested foundation genetics of the Angus breed.

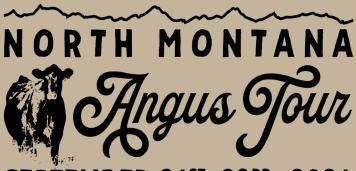

Next, we maintain a strong record keeping program while controlling our product from conception to consumption. We market our cattle directly to their endpoint by private treaty in all phases of the operation, from seedstock (bulls and females) to locker beef, with other herd sires sold through test stations. All cattle (replacements, breeding bulls and steers) are developed and fed out on the ranch. The steers are killed locally and marketed directly as locker beef, allowing 100% collection of both live performance and carcass data. Aimee, Andrew and Brandon

have completed the MSU Extension carcass grading course and the entire family has been extensively involved in the 4-H Meats Identification program in order to use our data and genetics to raise the best beef possible. Utilization of AHIR data to optimize total performance and to avoid single trait selection has built a cowherd without extremes that will function in many environments with whole herd average EPDs of BW 2.0 WW 49 MM 22 YW 87. 7 Bar Heart steers consistently produce 650 pound carcasses that grade Choice, YG 1-2, BF 0.25 in. at 12-14 months of age, without hormonal implants or subtherapeutic antibiotics. We assist our seedstock customers with AHIR and BRS data collection in their own herds to achieve similar results with 7 Bar Heart genetics.

Our third and perhaps most important tenet is land stewardship. All phases of production are carried out in keeping with the principles of sustainable agriculture. The ranch is managed to maintain the cowherd, wildlife and environment in harmonic balance without the use of synthetic inputs. This requires extremely efficient cattle to ensure optimal usage and conservation of resources while increasing stocking rates, enhancing habitat, and allowing the livestock to express their full genetic potential. Our sons intend to continue this philosophy into the next generation. They are attending Montana State University, Andrew in Animal and Range Science and Brandon in Natural Resources and Rangeland Ecology.

7 Bar Heart has won many state and national awards for its environmental practices, including the Land Stewardship Awards of the American Angus Association, Farm Journal and AERO. The family has also been named the Montana State University Outstanding Agriculturalists of the Year.

When we first started in the Angus business, Jim Turner from Green Valley Angus shared a most valuable piece of advice. He told us, "Start with good foundation cows, add the best bulls you can find and raise your own replacements, because you'll never be able to buy heifers as good as the ones you can raise. Remember you're in it for the long haul and do it right from the beginning." At 7 Bar Heart we will continue to work long into the future to raise the right kind of Angus cattle that will be both efficient and profitable for cattlemen everywhere, in every phase of the industry. We appreciate this opportunity to be on the 2021 Montana Angus Tour!

SEPTEMBER 21st-23rd, 2021

#### Windy Ridge Angus

Chuck & Karen Davis
PO Box 336
Geraldine, MT 59446
windyridge@itstriangle.com • (406) 737-4320
www.HarrersLostLakeRanch.com

Our stop will be the lunch location on the first day of the tour, Wednesday, September 22, 2021, in Fort Benton, the birth place of Montana. We will have our cattle on display at the fairgrounds along with Lost Lake Ranch and Owen and Mariel Stone. Our home place is located 3 miles west of the town of Geraldine towards the Highwood Mountains. This is the 85th year that the Harrer family has been in the cattle business.

Windy Ridge is a unique business. As Chuck says "his dirt and Karen's cows" in other words he is a dyed in the wool farmer and "helps" with the cattle. The reverse is also true, I manage the cattle end of things and "help" with the farming and harvesting. Our son-in-law and daughter, Jeff and Kara Schile manage Lost Lake Ranch for my brother, Dr. Grant Harrer. Our son and daughter-in-law, Noah and Amber Davis, plan on joining us working on the farm in the coming years.

Windy Ridge garnered its name from the ridge where our house was built, we have consistent "breezes" with a beautiful view.

Our wheat and barley farm has herd limiting

factors such as lack of water and grass land. We only keep the most productive cows and those that have the characteristics for which we are striving, moderate birth weights, high gain potential, frame soundness, maternal strength, and disposition. I AI all of the heifers and 30 percent of the cows, matching pedigrees that compliment each other without getting extreme in any one direction. I believe I can do that better than some ranches as I know all the cows in the flesh and on paper. Recently our emphasis has included adding more carcass quality to our herd by the AI sires we choose and the bulls we purchase, as exhibited by the calves we will have on display: AI calves sired by 2XL Bronc, as well as calves from our herd sires AJR Epic, SS Payweight, and Hilltop Allied.

Welcome to our part of Montana and enjoy the tour.

#### Lost Lake Ranch

Grant & Deanna Harrer
137 Eden Road
Great Falls, MT 59405
drharrer@gmail.com • (406) 452-2010
(406) 899-9061 • www.HarrersLostLakeRanch.com

Welcome to the 2021 Montana Angus Tour!

Harrer's Lost Lake Ranch is found by traveling Hwy 80 between Ft. Benton and Geraldine, Montana, turning off the highway to the south just before the #19 mile marker, then following the signs along a gravel road approximately 10 miles to the ranch buildings.

Lost Lake derives its name from a lake located at the bottom of sheer rock cliffs that plunge from the surrounding prairie, which hide it from all but one view. Lost Lake Ranch headquarters lie adjacent to this lake; the ranch extends from the plains, through the old Missouri River breaks, and into the north end

of the Highwood Mountains (summer pasture).

J. O. Patterson began this ranch in the late 1800s, initially raising sheep and later Hereford cattle. Lost Lake Ranch headquarters was one of Montana's first post offices and there remain stagecoach tracks across Lost Lake Ranch land. Bill and Dolores Harrer purchased the ranch in 1968, transitioning from the Green Meadow Ranch in Helena. The conversion to an all-Black Angus ranch ensued. Initially the emphasis was on commercial cattle.

In the early 1990s, Grant and Deanna Harrer purchased the cattle and leased the land. Conversion to an 80% registered cow/calf operation has since occurred ... the rest being commercial cattle. The ranch now sports 400 plus cows. In addition to the cattle, crops include alfalfa/grass/pea/grain hay and some wheat, barley, and oats

Jeff Schile (ranch manager) and his wife Kara (Davis) Schile joined us in January 2010. Bill remains in an advisory role at 95 years old; Dolores passed in June 2021.

The Angus produced by Lost Lake Ranch have been strongly selected for fertility, calving ease, explosive growth, carcass quality, soundness and disposition. As a modest sized operation, we spend a lot of time with the sale bulls; customers very frequently commenting on the gentleness of their purchases.

The following is a partial list of sires of 2021 calves on the ground: 2XL Bronc 8153; ACC Ascension 7014; Baldridge Bronc; Connealy Front & Center; EXAR Monumental 6056B; GB Fireball 672; K C F Bennett the Rock A473; Marda Swagger 463; Quaker Hill Firestorm 3PT1; Roseda Powerball23 F091; S S Enforcer E812; and SydGen Exceed 3223. AI breeding being an important management tool for the Ranch.

Our bulls and some heifers are primarily marketed through our annual production sale held the fourth week of March at Western Livestock Auction in Great Falls (Monday, March 28, 2022). Steers are sold in the fall and other heifers typically in the winter or spring, private treaty.

We look forward to seeing you on the tour, displaying our cattle, and sharing our part of Montana.

#### Stone's Blackrock Cattle

Owen & Mariel Stone
163 Stone Blvd
Geraldine, MT 59446
sbrcattle@gmail.com · (406) 737-4257
www.SRBCattle.com

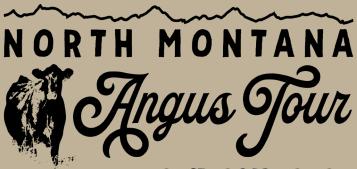

Stone's Blackrock Cattle is a subsidiary of Stone Farms, which is located near Geraldine on the plains of southcentral Chouteau County. Owen and Mariel Stone (4th generation), began our seedstock offering in 2014; 105 years after the family farm was homesteaded. Our vision was simple: "Quality cattle, local feed, reasonable prices." So what does that mean?

Our herd has never been huge, but we have always had a drive for quality. Our cattle are easy calving, easy to handle, and easy on the eye. We strive for a correct phenotype and pounds in the fall. If it isn't a bull or heifer that we think we would like to keep for next year, they go to town in the fall. We are that picky. Our feed is home grown on our family farm, 100% for our cattle, and nearly 90% for our calves with the balance coming from our local feed supplier.

Reasonable prices are our way to give back to the community. Our private-treaty bull sale falls on a Saturday in early March. We sell both registered and commercial calves. We offer people a low-pressure day, so they can come and go as they please during calving season. We enjoy good conversation, as the bulls sell themselves.

We strive for excellence in maternal traits, docility, foot and leg structure, growth, calving ease and vigor, breed-back, and body condition. In essence, a cow in our herd has to take care of herself, be kind to me, get her calf up and growing, and make sure she keeps herself ready for next year!

**SEPTEMBER 21ST-23RD, 2021** 

Ox Bow Ranch Angus

Marc Orem
PO Box 215
Wolf Creek, MT 59648
oxbow1725@gmail.com • (406) 235-4281
www.OxbowRanchAngus.com

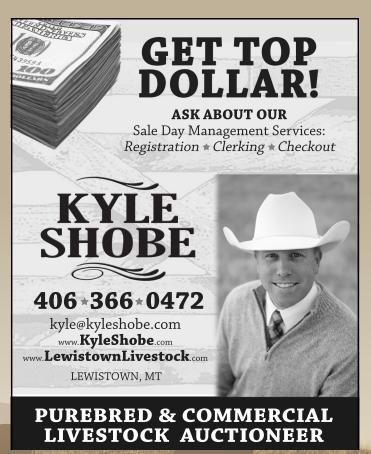

Ox Bow ranch is located alongside Holter Lake and the Missouri River, outside of Wolf Creek, MT. This is steep and rugged country, with low rainfall. This ranch has been raising Angus cattle here for over 20 years, with the emphasis on maternal strength - fertile, easy fleshing, good uddered, and moderate deep bodied, big ribbed cattle. Most all of these females go back to Emulation Ext and Traveler 6807.

These cattle see plenty of hard days in this country, from dry summers to frigid cold winters. By selecting and culling for only the

cattle that can perform in this environment, they should excel under most range conditions. We are asking them to do this on predominately foothill and mountain grass, with as little supplemental protein as possible. We ask them to travel long distances over rocky terrain to feed and water, maintain pregnancy, and bring in a good calf. They are fed hay or supplement from the beginning of calling through AI, and then turned out. Again we want these cattle to be tested on bad days here, so we know they will hold up during tough times, where ever they may go.

We sell around 100 head of yearling bulls and 30 selected two-year-olds at the beginning of March each year. These are truly the top of the bull calves raised here on the ranch. They are fed a balanced ration to test performance, but not hinder structural growth. All bulls are ultra-sounded and go through breeding exams before they sell. We continue to develop twoyear-old growth bulls on the ranch, and at each year's sale the heifer bulls will remain the majority of yearlings and the majority of the growth bulls will be two years of age. Since we are aware that accidents happen, we guarantee our bulls for the first YEAR. We realize that in a lot of areas you may not see all the bulls until late fall and they may not be retested until winter. This guarantee will cover you because we stand behind our cattle!

## from the ground up.

There are a lot of numbers to evaluate in today's beef industry, but none of them matter much if cattle break down structurally.

Our focus leans to the "old school" approach of retaining the basic fundamentals and qualities that made the Black Angus cow great.

We strive to breed functional, problem-free cattle with longevity that keep the cow man in business.

### DECEMBER 8, 2021

**SEPTEMBER 21<sup>ST</sup>-23<sup>RD</sup>, 2021** 

#### SEPTEMBER 23RD - NORTH

#### Apex Angus

Daryle & Pam Swanson
Kurt & Colleen Swanson
Kirby & Rita Swanson
Connor & Erin Nelson
8056 Valier Hwy.
Valier, MT 59486
apex@3rivers.net • (406) 279-3548
www.ApexAngus.com

The Apex Angus families welcome you to the 2021 North Montana Angus Tour. We look forward to seeing old Angus friends and meeting many new. A total family operation which consists of four divisions of Apex Angus: The Mountain Front Ranch, The Dupuyer Ranch, The Bullhead site and The Valier Headquarters.

In 1945 Angus cattle were introduced to our 125 year old family ranch located 14 miles west of Dupuyer, along the Rocky Mountain Front. The yearlings are summered there and many pairs are also moved in for fall pasture and weaning. In early 1960 we began performance testing with the original Montana Beef Performance Association with our commercial herd. In 1972 registered cattle were introduced into the operation as Apex Angus.

In 1973 we entered bulls in the Havre Testing Station and in the Midland Bull Test for many years. In 1994 Apex Transform 013 was the high selling bull at the prestigious Midland Bull Test Sale.

Valier Headquarters is where Daryle and Pam, Kurt and Colleen, Connor, Erin and Aubrey live. The registered herd is moved to the Valier Headquarters in December. Kurt and Connor do all the calving, manage the Performance Bull Test, heifer and sale facility. The commercial unit is 3 miles west of Dupuyer where Kirby and Rita winter and calve out the commercial cattle. The bulls are weaned the first week of October and sent to our testing facility. Our top performing bulls will sell in the Annual Performance Sale, March 1st, 2022, at Valier, along with 120 top end Solid Foundation Heifers. Our steers are sent to Poky Feeders in Kansas finishing with a large percentage of CAB and Choice Carcass's.

It's been a real pleasure to see and visit with all of our Angus friends, one of the highlights of the Angus business. A big thanks to our sponsors, friends and neighbors for your continued support. Mark your calendar for Tuesday, March 1st, 2022, for our 49th annual "Apex Value Added Production Sale"

#### Flesch Angus

Jeff & Nanna Flesch
PO Box 574
Shelby, MT 59474
jeffflesch@aol.com • (406) 337-3402
www.FleschAngus.com

Welcome to the 2021 Montana Angus Tour, we're excited to host this year's tour and look forward to seeing and visiting cattlemen from afar! Unfortunately, the dry conditions in the west have taken their toll around here like for

## NORTH MONTANA Angus Jour SEPTEMBER 21<sup>ST</sup>-23<sup>RD</sup>, 2021

many across the country, but it gives us the opportunity to show you what the Angus cow is best at, producing and sustaining herself and her progeny in tough conditions.

Flesch Angus started when my grandfather
Lester bought his first set of Registered Angus
cows in Canada in 1963. He and my father
John built a strong set of Angus cattle from
production sales and dispersal sales from across
the region. They established a production sale
32 years ago and been marketing seedstock
since then

My wife and I moved home 14 years ago to help on the family farm and ranch. I went to college at Colorado State University, then worked for a veterinarian who specialized in embryo transfer before moving back to Montana. After moving back, Dad turned me loose with the breeding decisions and management of the cow herd. We implemented a stronger ET and AI program, focusing on producing larger sire groups of full and half brothers for our production sale but most importantly building the cowherd with full and half-sisters out of proven cows to move our cowherd to the next level.

We have always focused on multi-trait selection, selecting cattle that work in our harsh environment. Cattle with real world performance and solid foundations. I enjoy looking at cattle. I like the females to be feminine, angular, with some shape and body. Our customers sell their calves by the pound, so performance pays! We offer bulls with Power, Performance, and Phenotype.

My father dispersed all of his cows last fall, but we were able to buy some of our favorites and along with our own cows hope to continue Flesch Angus for many more generations. We also run a small herd of Simmentals and my son Jagger also has a small herd of Hereford cows. We have our production sale the second Friday in March so our next upcoming sale will be held March 11, 2022.

We hope you can join us for the Montana Angus Tour! There will be lots of great breeders and great cattle to view.

#### Turner Angus

Paul Turner PO Box 145 Shelby, MT 59474 pturner@northerntel.net · (406) 337-3800 www.TurnerAngus.com

I hope everyone reading this gets the opportunity to go on a tour. They are a blast. I believe I offer a unique perspective for the Angus breed and the tour participants. In my desert environment I receive less than 10 inches annual precipitation. Drought is common - wet years rare. I graze as long as I can and try not to feed over 90 days. I start calving in April. The cows and heifers calve together unassisted on pasture with close to 100% of the calves born during the day, with most in view of where I fed that morning (coyotes). The mature size of my cows isn't very big, but once I stopped concentrating on performance and switched my focus to pounds produced per acre and profit, it was easy to see the best cows and the direction for the future. The smaller framed 900 - 1100 pound cow seems to work the best in my environment under my management. I have practiced line breeding for the last 20 years. That, along with intense culling for mothering ability, hardiness and the removal of all cows with "mental" problems have left me with a highly intelligent herd with very strong herd instincts. I have developed a low input, least cost herd that thrives in a challenging environment where I focus on profit - not performance. Needless to say I am on a different road than most of the Angus breed. The Associations genetic numbers are nothing but junk with very little use in the real world. It seems there is no one back in St Jo that knows which end of a cow the grass goes in. It would help the commercial producer immensely if the Board of Directors had to pay for land selling steers. In conclusion, It really doesn't matter what I say standing on top of this soap box. Seedstock producers chasing numbers and pounds have no use for my genetics and the people that could really benefit from my cattle don't have the time or money to go on the tour.

#### Willekes Angus

Bob Willekes & Family
10 Cowboy Way
Choteau, MT 59422
mtmarblegranite@yahoo.com • (406) 590-2520

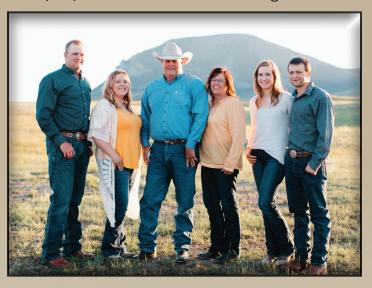

The Willekes family extends a warm welcome to all our 2021 Angus Tour participants. We are looking forward to seeing so many friends and familiar faces, who we don't normally get to see, except at an event such as this. Good Angus cattle sure have an amazing way of drawing a great crowd of people! Thanks to our good friends, Jeff and Nanna Flesch, we have been invited to their tour stop where we plan on exhibiting a select group of some of the latest Angus cattle genetics. Sires represented of this years calf crop will include: Resilient, Exemplify, Feature, Bravo, Spur, and FF Conclusion to name a few. Also check out a nice group out of our replacement bred heifers by JJ Weighup 294, Bravo, Conclusive, Rainfall, Greatfalls 630, and others. Our Son Marshall has been building his own herd and has recently purchased a nice set of registered cows from Top Notch Angus. Check out the progeny by Stevenson's Turbo Power, Top Notch Chaps 816, and Will Bravo G09. The emphasis on our program is the mother cow. We insist on only keeping cows that will bring in a good calf on time, year after year. Any cow that shows up with a bad attitude is culled. If there is a foot, utter, or something not quite right, she will join our recip pen. We typically flush just a few cows each year, and put in about 50 embryos, mostly from our own donor cows. We have been bringing a pen of bulls to Midland Bull Test for the last 20 years, with some great success. For the last few years we also have entered bulls in the Treasure Bull Test where were fortunate to have a few stand out bulls near the top of the sale. Both are great outfits with great people. We feel we have a few stand out bull calves again this year, and are excited to see how they do when they hit the performance tests. Each year we sell a few of our best bred heifers and/or heifer calves a the Nile Sale. This year we again hope to enter

a few select females. Be sure to check them out! Thanks to each and every one for your participation in this great Angus event! We are looking forward to seeing you all September 21st to the 23rd.

#### Bobeat Angus

Bryan & Ernie Ratzburg 265 Bobcat Angus Loop Galata, MT 59444 gus@northerntel.net • (406) 93

bobcatangus@northerntel.net · (406) 937-5858 (406) 788-3244 · www.BobcatAngus.com

Bobcat Angus is located in northern Montana in a region known as the Sweet Grass Hills. We have been raising top registered Angus cattle for about 25 years. We run in an area with pretty harsh weather conditions, and like we tell a lot of folks — if our cattle can survive and thrive in our area then they can thrive anywhere!

We currently run 500 registered Angus mother-cows at Bobcat Angus. One third of these calve in the Spring and the remainder in the Fall.

We also maintain a large commercial cowherd and merchandise our steer calves through Northern Livestock Video.

We offer all of the bulls through our production sale each January and sell bull calves, fall yearling and coming-two-year old bulls. Along with this we sell 1200 females in the sale each year.

Proven herd sires which we own include Circle L Gus, Vermilion ReRide, Vermilion Spur B024, Musgrave Big Sky, WK Bobcat, Mytty Natural, and HF Powder Keg. A couple years ago, we sold a son of Musgrave Big Sky, Bobcat

Blue Sky, to ST Genetics. WK Bobcat currently has a significant influence on our mature cows. Select Sires sought us out and bought an interest in Vermilion Spur B024 who has an outstanding spread for a heifer bull. Genex Cooperative has partial ownership in Vermilion ReRide and is promoting his genetics.

Bobcat Angus is an enterprise within a fortunate situation. We are one of the few operations in the state of Montana that raise all our feed for the livestock operations, including registered cattle, feeding and developing bulls, background and breeding commercial heifers, a commercial feedlot operation and a sizable cowcalf operation. We are able to showcase bull genetics by proving their outcomes through our large commercial herd and 1500 head of commercial heifers.

Bryan and Ernie Ratzburg and families look forward to meeting you and showing you our Northern Montana operation.

#### Connelly Angus

Don & Wendy Connelly 1950 Dean Road Valier, MT 59486 connelly@3rivers.net · (406) 279-3569 www.ConnellyAngus.com

Welcome to the 2021 Montana Angus Tour! Connelly Angus Ranch is located 6 miles north of

Valier, Montana. It is operated by Don, Wendy, and family. This family run ranching and farming operation currently runs 500 registered cows, which are the result of 62 years in the cattle business. The farming involves the raising of spring wheat, malt barley, alfalfa and grass hay.

In 1974, with 250 commercial mother cows, Clarence started the registered Angus herd with the purchase of 20 bred heifers from Charles DeBoo. These heifers were mostly Pattern of Wye and Revolution breeding. From there two bulls we purchased from the GDAR program "Viking 977 GDAR (maternal brother to Rito 054 and Traveler 1148) and Traveler 1114 GDAR are responsible for producing the top foundation females our cowherd is based on.

Our breeding philosophy has always been centered around producing problem free females with excellent longevity that can survive and excel in a commercial cowmen's environment. This can only be accomplished with females that have excellent structure and feet and superior udder and teat qualities. We believe in a moderate framed cow that milks well while holding her condition and can consistently wean off a heavy calf. In our program, we place high emphasis on fertility, carcass quality, natural thickness, maternal traits, fast growth, quiet dispositions and moderate birth weights. At Connelly Angus we have been stacking cow families with these characteristics to produce an elite cowherd that can produce a consistent and quality product for the long run. A testament to our program is the high percentage of pathfinder cows in our herd.

A few bulls produced in our program that have made a lasting positive impact in our program and many other programs across the country are CAR Tracker 904, CAR Duke 104, CAR Efficient 534, CAR Chinook 786, CAR Remarkable 821 and CAR Hickory 547.

We start calving every year on the 20th of January. The cattle are summered on native dryland pastures in the foothills of the Rocky Mountains from the 1st of June until the 1st of October.

We market our cattle through our annual "Genetics for the Long Run" Production Sale on the last Tuesday of February, where we will offer 130 bulls and 20 heifers. A select group of bred heifers and cows are available for sale by private treaty every fall. Again, we would like to welcome you to the tour, and are looking forward to visiting with you all. Stop in anytime, we would be happy to show you our cattle!

## Where do I find these genetics?

#### Native Aberdeen Angus Cattle

Ark of Taste

Aberdeen Angus is a famous name and it is popular on menus across the world, but few realize that most of the time they are eating a cross bred animal at best (they are allowed to be called Aberdeen Angus when only sired by a bull, therefore 50% Aberdeen Angus) and black cattle at worst (for in USA they only need to be black to qualify for the Certified Angus Beef Scheme). As farmers look towards profit and mechanization they select species for larger conformations of cuts to the detriment of flavour and texture. The development and cross breeding of the species has created a breed that is a shadow of its former self. It could be said that the modern angus is trading very much on the reputation built by the original Angus breed. In contrast the original native bred Aberdeen Angus is 100% pure bred from heritage, grass fed and traditionally reared beasts with no imported bloodlines.

The native bred Aberdeen Angus originated on farms in the Scottish counties of Banff and Angus but now in Angus and Borders. The original herd dates back to the 1830's, with Herd Books dating from 1860's. There were nine cow families left when Geordie Soutar rescued them from near extinction.

Aberdeen Angus is seen as a beef cattle nowadays but was traditionally a smaller, dual-purpose beast for both dairy and meat production. Farms used it to give milk for cheese, crowdie and butter. The short fibers produce tender meat with a healthy balance of nutrients. More recently the breed has been 'developed' and most are now American, Canadian, or New-Zealand Aberdeen Angus to be bigger animals that grow more quickly, sacrificing the flavours and qualities unique to the Scottishs native breed.

There is a risk they will be cross-bred into extinction with the modern Aberdeen Angus to achieve bigger faster growing animals. The native bred Aberdeen Angus are famous for surviving on less food, having been used to the harsh environment of rugged Scotland. Modern breeds cannot cope with this as they are modified for consuming more energy, including fattening on grain, for fast growth. There are dedicated farmers who still retain their pure bred herds, there are approximately 150 to 250 breeding animals left and it is on the Rare Breeds Survival Trust Critical List.

This breed is rich in flavour, with a hint of sweetness from the grass, juicy and with exquisite marbling throughout. The breed, feed, flavour and hanging from these traditional methods makes for a superb product. It is versatile with all the traditional cuts – slow cooked or grilled, roasted or cured, minced or for charcuterie. The smaller conformation allows for a thicker steak with the resulting contrast in textures – caramelized outside and buttery, melt-in-the-mouth inside.

# We do one thing . . . Angus!

### Maternally Based!

Over half a million dollars worth of progeny sold, including HA Value Added 7578, Hoffman Thedford, Hoffman High Road, and HA Opportunity H695 (Son of Bubbs Southern Charm), the third high selling bull of the 2021 sale.

Sustainability, easy fleshing, structural correctness, breed up, efficiency and production are not buzz words, they are the foundation on which we have built the Hinman Angus Cow Herd. Hard winters and dry summers are the norm and your cow herd better be prepared. We use a fair amount of HA raised bulls back in our program because we know the maternal genetics are strong and will keep our commercial customers in THE COW BUSINESS!

Dam of the 2019 sale topper HA Cowboy Kind 8157 and 2021 high selling bull HA Scale Crusher H677

Customer Service- Providing health, feedlot and grid performance data for our customers for over 25 years.

Reminisce Cows- Cow herd performance starts with measuring structural soundness and disposition. If these 2 traits aren't in order, it doesn't matter how fertile she is or how big of calf she can raise.

Reminisce Bulls- Born and raised in altitudes above 7,000. Developed on a 41 mega cal ration; Summered in big sage brush pastures to learn to travel in big country.

How Good are Your Cattle?

Bragging rights on performance begin and end on the rail. On that day you will know how healthy they were, how well they gained, how well they converted, and how well they will taste to a consumer that doesn't know you. We all sell our cattle by the pound and on that day you will be paid accordingly. Do you know how good your cattle are? Reminisce Angus customers do. They have the data. They have the bragging rights.

If you are going to pay for land selling calves, you have to be a low input, least cost producer focused on profit.

That means smaller cows, more of them, producing more pounds per acre, sold at a higher price per pound. Smaller pastures, grazing longer, feeding less. Calving later with more live calves, fewer cull cows, fewer replacements.

And if you are all in, it means raising your own bulls.

Raising Line Bred, Low Input, No Maintenance, Hands Free, Brown Grass Cattle.

Common Sense Cattle Designed to Work for a Living

### Calf scours are not inevitable. A strong prevention program is non-negotiable. Dependable scour prevention is essential for calf welfare, employee morale and business profitability. The immune system's response to vaccination is variable and unpredictable. That's why giving preformed antibodies instead of relying on a vaccine to stimulate antibody production is so important. I'm all for removing uncertainties. So yes, I stand by this product. (And no, I'm not.) Marissa Hake, DVM Learn more at FirstDefenseCalfHealth.com Calf Vet © 2020 Immucell Corporation. ### ~ SALE SEASON WRAP-UP

**Kurt Kangas Regional Manager** 

ALL Breeds FY2021, Montana & Wyoming						
Breed	Count	Gross	Avg			
Angus	11,739 HEAD	\$61,911,500	\$5,274			
RED ANGUS	2,021 HEAD	\$9,731,069	\$4,815			
AngSimX/Simmental	1,157 HEAD	\$5,756,212	\$4,975			
Charolais	1,048 HEAD	\$4,863,426	\$4,641			
Hereford	821 HEAD	\$6,070,250	\$7,394			
SALERS/OPTIMIZER	128 HEAD	\$480,492	\$3,755			
TOTAL	16,786 HEAD	\$88,332,457	\$5,262			

Data accumulated from American Angus Association, American Hereford Association, Western Livestock Journal, Western Ag Reporter, Bill Pelton Livestock

"The 2020 sale season was a good one in the region. Crowd attendance was back up from the COVID lows and a relatively open winter allowed folks to make it to sales. What's really most encouraging is that the 2021 Summer feeder calf sales have been much better than anyone could have imagined. 11,739 Angus bulls averaged \$5,274. Above is a look at what all breeds did this past sale season in Montana & Wyoming:"

360° VIRTUAL LAND TOURS WE OFFER 360 DEGREE LAND TOURS TO OUR CLIENTS.

### ~ FEATURED LISTING ~

### LITTLE MUDDY CREEK RANCH \$3,750,000 | 3,647 ± acres | Montana

Wrangle up the cattle and roam the 3,647 acres of rangeland. This ranch located in the "Last Best Place" of central Montana has fertile soils, flat, level fields and abundant water availability. Virtually untouched, the region is valued for its consistent high-quality grain production and nutrient-dense grasses. Free and clear of all restrictions and covenants, the versatility of the land presents opportunity for the discerning buyer that is interested in making an investment in a unique property. The property is currently leased out generating \$122,800 per year of income. Two creeks traverse the property: Little Muddy Creek and Dry Fork Creek. There are four developed springs and an Artesian well. The land spans wide and far with views of Square Butte, a distinguished landmark in the Sun River Valley.
