The Montana Angus News is the official publication of the Montana Angus Association and is available to anyone interested in Montana's Angus cattle. However, advertising is restricted to those raising Angus cattle in the state, those consigning Angus bulls to Midland Bull Test or people servicing cattlemen with their business located in Montana.

Since the magazine is not subject to subscriptions, the only feasible way it can be mailed is at bulk rate; therefore, advertising for events scheduled within 18 days of publication will be accepted only at the advertisers risk, and this publication will assume no financial responsibility for distribution on its entire circulation prior to that time.

Finally, the information contained is from sources deemed reliable, but is not guaranteed.

Greetings Readers!

I'm writing this over Labor Day weekend so for those who work in acres and not hours, thank you! Summer definitely feels like its come to an end with the recent cooler temperatures overnight. Am I surprised to see that we have 90 degree temperatures in the forecast this week followed by almost freezing temperatures? Not at all. If you don't like the weather, wait 5 minutes, right? Let's hope that the beautiful fall weather holds out for the 2022 Eastern Montana Angus Tour to be held September 20-22, 2022 in Sidney, MT. It's always an enjoyable time to visit with neighbors and other friends and contacts while looking at some fine Angus cattle in the Big Sky state. We hope to see you there!

The Montana Angus Association Annual Meeting will be held on September 20th, 2022, in conjunction with the Montana Angus Tour and at that meeting, Jake Callantine will step down as President of MAA after leading the Association for the last two years. It's truly been a pleasure working alongside Jake as he's been an excellent leader for the breed and for our membership. If you see him around, be sure to thank him for his time spent with the Montana Angus Association. His influence, candor, and hard work will surely be missed but we look forward to new initiatives that come with the turnover. I'd also like to thank Tim Skinner for his time spent on the board!

I'm sure looking forward to seeing everyone at the Montana Angus Tour and the NILE Angus events this fall. Beyond these association events, good luck to those with fall sales coming up. It come as no surprise that Montana has so much to offer in terms of quality Angus genetics.

Happy Trails,

Jesse Thompson

PRESIDENT'S MESSAGE

Greetings Fellow Angus Breeders,
The weather man keeps saying “just one more week of hot weather” and I’m sure we are all more than ready for him to be right! Cool fall temperatures and some moisture would sure be nice. Summer calf and yearling sales have been strong and we expect the same for seedstock sales as well.

I urge you to take advantage of the numerous opportunities to invest in Montana Angus genetics this fall. There will be plenty of bull and females sales from which to choose.

The Eastern Montana Angus Association will be hosting the Montana Angus Tour, headquartered in Sidney, September 20-22. If you haven’t yet, be sure to register soon to save your seat on the bus. Additionally, the NILE Angus Female Sale will be held in Billings on October 22nd. This sale is packed with excellent Montana Angus genetics and a great opportunity for Junior members as well.

This past year we have felt the loss of some truly wonderful members of our Angus family. Our hearts go out to the Fleisch, Leachman, Davis and Van Dyken families. Their impact resonates with each of us and the Association as a whole. We are beyond grateful for having known them and their legacy. We will miss each of them tremendously and our thoughts and prayers are will these families in their time of need.

Thank you for allowing me to be your President for the last two years. Its has been a humbling experience to say the least. Serving with progressive breeders like Tim Todd, Dale Vitt, Cory Poser, Klint Swanson, Jeff Fleisch, Roger Indreland, Ron Frye and the current board has been an experience I will not soon forget. Special thanks to Jesse Thompson for keeping us all in order, I am sure its like herding cats!

As always, there’s no better time to be in the Business Breed....

-Jake Callantine, Montana Angus Association President

DVM Dialogue

Dr. Casey Solomon, DVM

Hello Again from North Central Montana, What a wild ride this state has experienced in the last 12-18 months. We've had widespread drought, flooding events, explosive hay prices (and fuel, fertilizer and other inputs), volatile cow markets & I'm sure I'm missing many others...

One thing is certain in this profession we call agriculture; we never stop receiving opportunities to learn. But I for one, am ready for things to calm down a touch!

In the midst of this unruly season, we've decided to put a new spin on the DVM Dialogue column and ask for questions from our readers and producers. I will continue this segment for the remainder of the publication season (or until we run out of questions).

The first question we received was:

What are your thoughts on giving a live vaccine to pregnant cows?

And

What are your thoughts on different pre-conditioning protocols?

What a great question for this season, so lets see if I can get you some answers!

MODIFIED LIVE VACCINES IN PREGNANT ANIMALS

In the last decade or two of veterinary medicine, we have tweaked our recommendations to producers about annual vaccine protocols in our cow herds. I feel it is an important question to address as new research comes available and as we receive disease pressures on our cow herds. There are many facets to this question and I welcome specific questions from producers on this topic, but for the sake of word count I am just going to address what I feel is the best case scenario for herds and why I recommend the protocol.

Modified Live vaccines (MLV) shine in their activation of the immune system and their duration of immunity. They hold an important place in a herd's vaccine protocol to prime immune systems for annual vaccination later in life.

I recommend the use of MLV's in young stock (branding, preconditioning/weaning, and post weaning development). I recommend to my producers to use modified live vaccines at branding, precon/weaning and then 1-2 boosters during their development period prior to their first breeding season. It is important that bulls receive their last modified live vaccine no later than 60 days prior to their first bull test or breeding and that heifers receive their last modified live vaccine ideally no later than 40 days prior to their first breeding. This is important because MLV's can cause altered semen and oocyte production and decreased fertility within these windows of time.

Annual vaccination of the cow herd can be done safely and effectively using a hybrid vaccine product or killed vaccine product, in the fall, at pregnancy diagnosis. Another option is to administer a MLV booster annually to the cow herd in the spring, within a safe time frame prior to breeding (ex: branding time). It is important to note that some research suggests there is a benefit to utilizing both MLV and hybrid/killed vaccine products in a cow herd protocol, as a stronger immunity may be elicited by activating the immune system with different products.

The vast majority of my producers utilize a MLV priming in their youngstock and then annual vaccination of their cowherd with a hybrid vaccine product and I have been very happy with the safety and efficacy of this protocol.

PRE-CONDITIONING PROTOCOLS

When people call to order their pre-conditioning vaccines, I usually run through a list of questions to find the best fit for their operation and current situation.

I'll run through the list of questions and the comprehensive options available to answer the questions. At the end of the segment, I will put together a few of the most commonly utilized protocols in my practice.

1. Have you contracted your calves?

a. This is the most important question to consider when selecting pre-conditioning vaccines. Calf contract obligations often guide our choices for vaccine selection. The most common requirements for contracts are:

i. 2 doses of a "blackleg" product – Most commonly calves are on one of 2 programs:

1. They receive a self-boosting type product at birth (ex: Alpha 7) and a booster at pre-conditioning (ex: Vision, UltraBac).
2. They receive a product at branding and a booster of the same product at pre-conditioning (ex: Vision, UltraBac).

***It is important to note that often calf contracts dictate that the "blackleg" pre-conditioning booster contains a Somnus component. I am comfortable with calves receiving an initial somnus vaccine at pre-conditioning time, but do not typically vaccinate younger calves (birth or branding age calves) with a somnus combination vaccine.

ii. 2 doses of a viral “5-way” vaccine (IBR, PI3, BRSV and BVD I and II)

1. Calves receive an intranasal vaccine at birth (ex: InForce 3), a booster at branding along with a BVD vaccine and then a booster of the 5-way viral at pre-conditioning.
2. Calves receive an intranasal and BVD vaccine at branding and a booster of the 5-way viral at pre-conditioning.
3. Calves receive a 5-way viral at branding and pre-conditioning.

***Intranasal vaccine technology offers the benefit of being easier on the calf and a “prevention of infection” vaccine claim – meaning the vaccine actually prevents viral infection by neutralizing and expelling it before it can take hold in a calf’s system.

iii. 1 or 2 doses of a Pasturella vaccine

1. Calves receive a pasturella vaccine at branding and preconditioning.
2. Calves receive a vaccine at preconditioning.

iv. Adjunctive products to consider

1. Growth Implants – with good feed resources, these products may add pounds to your calves. Growth implants are prohibited for “all natural” calf sales.
2. MultiMin – a injectable multi-mineral supplement that boosts minerals important for calf health.
3. Internal parasite control – injectable and oral dewormers typically do a better job at parasite control when compared to pour-on formulations. Calves tend to benefit from injectable products if preconditioning occurs 4 -6 weeks prior to marketing.
4. External parasite control – pour-on fly control is very helpful around pre-conditioning time, because fly stress can drastically limit growth during the summer period prior to marketing.

2. How is your calf health? What is the environment like?

- a. I am more likely to recommend intranasal vaccine products with dry/dusty conditions. Intranasal vaccines offer protection as soon as 3 days after administration. Injectable vaccines take 10 days or longer to build an immune response and offer protection.
- b. If calves are fighting particular issues (summer pneumonia, lack of thriftiness, pink-eye), I may add on adjunctive products or vaccinations at the time of pre-conditioning to optimize the “chute time” for the producer.

3. Are you retaining ownership after weaning?

- a. Seedstock Producers developing replacement females or bulls need to consult about the long-term affects of vaccines and pharmaceuticals used at pre-conditioning and integrate them into a long-term health protocol.
- b. Producers retaining ownership after weaning in the feedlot may also benefit from more products as a long-term investment for growth and performance.

Example Protocol #1 (“seedstock” protocol)

- Birth – self boosting “blackleg” product (ex: Alpha 7), intranasal vaccine (ex: InForce 3)
- Branding – Intranasal vaccine, BVD/Pasturella combination vaccine
- Preconditioning – 5-way viral/pasturella combination vaccine, “blackleg” booster, with somnus (ex: Vision + Somnus, Ultrabac + Somnus) injectable dewormer, fly control
- Weaning – typically nothing, but may boost an intranasal product if conditions are exceptionally dusty or if calf health is borderline/fighting summer pneumonia issues.

Example Protocol #2 (“cow/calf” commercial protocol)

- Birth – self boosting “blackleg” product
- Branding – Intranasal vaccine, BVD/Pasturella combination vaccine
- Preconditioning – 5-way viral/pasturella combination vaccine, “blackleg” booster, with somnus (ex: Vision + Somnus, Ultrabac + Somnus), fly control +/- injectable dewormer
- If conditions are dusty or if summer pneumonia is a problem, I opt for a repeat of the branding intranasal and BVD/Pasturella combination vaccine to get a quicker immune response to the respiratory problems.

Just remember – there is an endless combination of products and solutions for your herd. Working with your veterinarian to develop a protocol that works for your operation is the best way to ensure a successful herd health program.

Also remember – NUTRITION NUTRITION NUTRITION!!! Vaccines are only effective if the calf and cow health and immune system is capable of responding to them. Nutrition and trace mineral balance is the key factor that drives success for any operation.

REMINISCE INFLUENCE BRED HEIFER SALE

TUESDAY, NOVEMBER 15, 2022

Reminisce Angus Sale Barn, Dillon, MT

**500 head of
Heifers!**

- Pelvic measured prior to breeding
- **350 head** AI'd to the American out cross standout, **RM McClendon 9599**
- AI'd to start calving February 2nd

RM McCLENDON 9599

is an American outcross, true calving ease standout. He has been AI'd to over 2,000 heifers as of 7/04/2022 with no reports of any calving issues. These calves come easy and hit the ground with amazing vigor! He is a double bred calving ease sire that will splash new blood into nearly every herd in America. His Sire Dunlouise Cortachy Boy is a true calving ease, native Aberdeen Angus sire from Scotland. Nowhere in America will you find this pedigree and consistent calving ease. His maternal grand sire RM 2 Trend 3105 has been bred successfully to thousands of heifers in many herds with no difficulty. Both bulls in this pedigree produce calves with a lot of vigor at birth. Both sires are high marbling bulls as well.

AAA #19793942 // DOB: 06/01/2019

1ST CUT, 1 IRON

All heifers cleaned up with Reminisce Angus Cortachy Boy sons. Full Vaccination Program: Preg Guard 10, Vision 8, Virashield VL5, Valbaezon, Cleanup Brucellosis Free, Bangs vaccinated and bled for Brucellosis, BVD PI3 FREE, Preg checked twice
All calves will be eligible for the Reminisce Angus Beef Program.

DO THE MATH!

Efficiency proven genetics offer you up to 20% more savings on the cow herd...and 20% more savings in the feedlot. It doesn't cost you any more than making sure you're using the right bulls and the right program.

BEEF COUNTRY

Genetics Sale

The Efficiency Breeders

America's Largest Herd of Efficiency Tested Bulls

MATERNAL Research from Canada, Australia, Texas A&M, University of Florida, Montana State University - Dr. John Patterson, University of Missouri, University of Illinois...have all shown **efficiency gains of 10-20%** in females tested to be negative RFI or sired by negative RFI bulls with no impact on weaning weight, fertility or yearling weight, **yielding a \$100-\$150 savings.**

"Few management techniques can be offered to beef producers that yield a 10-15% improvement in production efficiency. By stacking generations selected for RFI improvement, greater than 20% in production efficiency can be achieved."

-Dr. Monty Kerley, University of Missouri

Stocker-Grass A 20% savings in wintering and pasture costs can easily yield another **\$50-\$70/head.**

Feedlot Improvements in feed conversion have been proven up to **20%**. Just a **15% improvement** would be a **\$150/head savings.**

COLEMAN ANGUS TO DONATE 2023 ANGUS FOUNDATION HEIFER PACKAGE SALE OF COLEMAN CHLOE 173 TO SUPPORT ANGUS FOUNDATION'S MISSION OF EDUCATION, YOUTH AND RESEARCH.

The 2023 Angus Foundation Heifer Package will be donated by Coleman Angus of Charlo, Montana. The heifer, Coleman Chloe 173 (AAA + 20076459), is the highest \$M valued Coleman Chloe female in the ranch's herd and is backed by a pedigree represented by the operation's most notable cow families. The heifer will be offered in January at the 2023 Cattlemen's Congress to support the Foundation's mission of furthering Angus education, youth and research efforts.

"We are honored to donate the female for the 2023 Foundation Heifer Package," said Larry Coleman, owner of Coleman Angus. "To be able to give back — because we've been so fortunate — is exciting."

Coleman Angus is a family operation who prides themselves in placing emphasis on the power of the Angus cow. Through meticulous selection for maternal traits, they have grown a loyal base of customers who value their herd's genetics. The ranch hosts an annual bull sale in February, offering between 175 to 200 bulls, and holds a female sale each year in October.

"We are thrilled Coleman Angus has offered this female from the iconic Chloe cow family," said Jaclyn Upperman, Angus Foundation executive director. "The Coleman family recognizes the importance of the Angus Foundation's mission as we work to ensure a bright future for the breed."

The sale of the Angus Foundation Heifer Package will take place Friday, January 6, 2023, prior to the start of the 84th National Angus Bull Sale during Cattlemen's Congress. The sale will start at 2 p.m. at the Oklahoma State Fairgrounds, in Oklahoma City,

Oklahoma. For more information about the 2023 Angus Foundation Heifer Package, contact Upperman at jupperman@angus.org or visit www.angusfoundation.org.

BROOKE VINCENT AND CATE DOUBET JOIN THE ANGUS MEDIA TEAM

Brooke is joining us as a Print Services Coordinator. Born and raised in Central Montana on an Angus seedstock operation, she was an active member in 4-H and FFA, as well as the Montana Junior Angus Association. She spent many summers with her sisters in the show barn and traveling to cattle shows around the state, as well as attending a few National shows during her career. She attended Northwest College where she was a member of the collegiate livestock judging team, and graduated with a degree in communications. Since college, Brooke has remained active in the industry and still lives and works in Montana. She continues to run registered Angus cattle with her parents in Central Montana and gets back home as often as she can to continue to be a part of her family's operation. She currently resides in Billings, MT, where she has been working as a marketing specialist for ORiGen INC. She also spends her time taking bull sale photos and videos and is the advisor of the Montana Junior Angus Association. She is looking forward to joining the Angus Media Print Services team and meeting everyone!

Today, we welcome Cate Doubet to the Angus Media team as a Digital Media Specialist!

Cate grew up on the Timber Line Ranch in Belgrade, MT running registered Angus cattle. She and her family market bulls and select heifers on an annual basis still to this day. Cate graduated from Colorado State University with an Animal Science degree while being on the Livestock Judging Team. Upon graduation, Cate started her own marketing company utilizing photo, video, and print media.

She and her family currently reside in Montana and enjoy running cows with their families.

We're excited to have you on the team, Cate!

Greetings from MSU Angus! School may just be getting back into session, but MSU Angus has been down to business all summer. The MSU Angus team was hard at work branding calves, assisting with embryo transfers, and breeding cows. We had a great summer, and hope you all did as well!

On July 14th, the MSU Angus team worked with Gary Porter (ET technician) to transfer embryos into recipient cows. Of our 48 synchronized recipients, we were pleased to have 42 of them receive embryos. Embryos included some that were purchased this spring while others were donated by Gartner Denowh Angus Ranch, Madrid Angus, and MLK Angus. Matings include Montana Donna 9102 x Coleman Rock 7200, Coleman Donna 7233 x SITZ Stellar 726D, SAV Montana Rita 7068 x Brooking Can Am 8812, GDAR Miss Wix 8161 x Ellingson Rangeland, SITZ Florabelle Fanny 5033 x SITZ Logo 12964, SITZ Miss Burgess 734X x Mytty Source 4082, Northfork Ellunas Elite 8137 x SITZ Dash 10277, and SITZ Eisa Evergreen 1824 x HA Cowboy Up. We were excited to have MSU Angus board member, Tim Skinner, there to assist with thawing embryos and work with the team. It was a great day, and we are looking forward to seeing these embryos as calves on the ground next spring.

MSU Angus bred the females during late July. We artificially inseminated 92 heifers (31 registered heifers) on July 21st at the BART Farm, and we artificially inseminated 136 cows (47 registered cows) on July 28th at Red Bluff. Dr. Tim DelCurto and Dr. McCoski assisted with thawing straws while Red Bluff Foreman Noah Davis, Town Livestock Foreman Danielle Duni, graduate student Andrea Rutledge, and other eager graduate students AI'd. As we all know, ranching is a team sport, and we had a great crew to help with the process. The commercial

heifers were bred to Sydgen Stealth 8556, and the registered heifers were bred to HA Cowboy Kind 8137 and Deer Valley Unique 5635. The commercial cows were bred to Holden Advance 8132F, and the registered cows were individually mated by Dr. Tim, Taylre, and incoming graduate student manager, Thomas Hamilton. These cows were bred to SITZ Logo 8148, SITZ Prodigy 12000, or SITZ Resilient 10208. Three MSU raised herd bulls - 2 sired by Coleman Marshall (AAA + *20150566 and + *20150564) and 1 sired by 44 Bragging Rights (AAA *20395459) were turned out with the heifers, and bulls Stevenson Templeton 80548 and Stevenson Hallmark 80711 were turned with the cows post AI. We are looking forward to the upcoming preg checking and weaning season and wishing everyone pregnant cow vibes and heavy weaning weights.

The MSU Angus program is so fortunate to receive such tremendous support from our Montana Angus producers. Thank you for encouraging the program!

If you are in Bozeman, please feel free to contact Taylre or I and we would gladly show you the MSU Angus cattle or answer any questions you might have. In addition, feel free to call or email if you have any questions or concerns.

Sincerely,

• Tim DelCurto

|| GARRETT JONES ||

MSU Student Spotlight

Hello Montana Angus,

My name is Garrett Jones and I recently finished my Junior year in the Ag business/Ag Economics program at Montana State University. I grew up on a small farm and feedlot and have helped my family develop a commercial and registered Angus cow-calf operation south of Miles City, Montana. This upbringing has given me an appreciation and broader understanding of the cattle industry and the commercial cattle owner's needs. Having knowledge of the commercial cattle business allows me to better understand the functional and desirable traits that need to be expressed in my own herd.

Like most places in Montana, I grew up in an area where the majority of the commercial cowherd is Angus-based. This made me realize the many benefits of the breed that eventually persuaded me to get into registered Angus. The strong maternal ability of the Angus female is what drives many producers to build a cowherd around the breed. The interesting thing about Angus cattle to me is the broad diversity of options customers have within the breed itself. For example, I am fascinated that some programs target maternal qualities while another program seeks performance and pounds yet a third focuses primarily for end product merit and some programs' main goal is presentation and phenotype. Certainly, this diversity creates controversy for those producers who are passionate about their specific program of developing cattle, but I believe diversity allows the breed to have a robust customer base and large market share of the cattle industry. I appreciate the flexibility that allows the commercial cattleman to be able to drive down the road and look at one set of cows or bulls, and then drive a little farther and look at a completely different set that might fit their style better.

Another attraction of the Angus breed in Montana is not only the superior quality, but also the great quantity of Angus genetics in the state. The addition of the Angus program paired with other opportunities at Montana State allows kids who are interested in the industry to meet current and future people in the business. Being around other people in the industry is what originally drew me towards going to school at Montana State University, while also being within driving distance of many nationally recognized Angus operations, bull studs, and lesser-known Angus cattle herds with equally high-quality stock. I believe the intense competition for Angus customers is what drives the breed to be better with each new calf crop.

The maternal Angus cow is what originally inspired me about the breed and is what I will continue to focus on in my own herd. However, the consistent amount of quality and diverse genetics is what brings many people to the breed. At the end of the day, if you don't like what you see at one place, all you have to do is drive down the road to find something different.

In Loving Memory - Nanna Marie Flesch

SEPTEMBER 4-JANUARY 22, 2022

Nanna Marie (Dickinson) Flesch passed away in a vehicle accident near Harrison, NE on March 25, 2022. Nanna was born September 4, 1979 in Sterling, CO to James and Sandra (Sewald) Dickinson. Nanna was loved by all, and loved all, especially her family. Her generous heart, giving spirit, and genuine personality defined the way she lived her life and cared for others.

Nanna spent her younger years showing steers and sheep in 4-H and FFA in Logan County. This began her love for agriculture and the outdoors. She also enjoyed volleyball and piano growing up. Nanna graduated from Sterling High School in Colorado in 1998. After graduation, she went on to attend Northeastern Junior College in Sterling and continued her education at Colorado State University.

She received her degree in Animal Science in 2002. Nanna enjoyed her involvement and friends she made within the CSU Collegiate Cattlewomen and Block and Bridle associations. Nanna always took the time to nurture these lifelong friendships.

Through the ag community at CSU, she met her future husband Jeff. They were married in 2004 and made their home in Johnstown, CO where she worked at Mountain Vet Supply. They moved to the Flesch family farm and ranch near Shelby, MT in the fall of 2007.

As soon as Nanna arrived in Shelby, she began working for Farm Service Agency (FSA) in Glacier County. She made instant friendships with coworkers and ag producers alike. She was always grateful for the people of Glacier County as they welcomed her with open arms, and she instantly felt at home in Montana. She ended her 13-year career with FSA closer to home in the Toole County office. She recently left that job to build a career as a realtor with Corder & Associates. She was just beginning to make her mark in realty, bolstered by her genuine heart and loyalty for her clients and friends. She was grateful for the opportunity to find a career that offered her the flexibility and the opportunity to be with those she loved the most, at home, on the ranch.

ARROWQUIP

Nanna was an integral part of Flesch Angus. Her perspective and attention to detail while creating the annual bull sale catalog turned Jeff's visions into reality. She enjoyed spending time helping Jeff and the kids in the barn, cultivating the passion for agriculture in the next generation.

Her professional successes were many, but her real accomplishment and passion was raising her beautiful family of rockstars - Preslee was born in 2008, Jagger in 2011, and Lennon in 2015. Nanna was her kids' biggest supporter at sporting events, 4-H activities and church. She travelled far and wide for her kids, usually throwing in a new adventure along the way: hiking, boating, visits to friends' cabins and taking in the beauty of the Montana outdoors. Thankfully, time was taken to make priceless family memories on recent trips to Nebraska for the National Junior Angus Show, Kansas for her nephew Kolton's wedding, and Las Vegas for the NFR.

Nanna was blessed with the character to build lasting lifelong relationships. She was the nucleus of a variety of friend groups, and she made each friend feel like they were her favorite! She always took the time to build new relationships and nurture existing ones. Nanna's infectious giggle and her mile-wide smile brought life to the room, along with her stylish outfits and stunning jewelry. Her legacy lives on through the meaningful relationships she developed and the hearts, character, and courage of her children.

She is survived by her husband Jeff and children Preslee, Jagger, and Lennon of Shelby; parents Jim and Sandra of Sterling, CO; brother Eric (Nadine) of Newton, KS; nephew Kolton (Ruthie) of Hutchinson, KS; numerous loving aunts and uncles: Carol (Mel) Weickam, Larry (Lori) Sewald, Tom (Dorea) Sewald, Kevin (Sheri) Sewald, Don Sewald, Sharon Sewald; in-laws John and Jean Flesch of Shelby; brothers-in-law Joe (Melissa) of Shelby and Jeremy (Jamie) of Laurel; and nieces and nephews Kylee (Lucas, and son Rye), Brinlee, Celee, Morgan (Sam) and Kincaid. She was preceded in death by her grandparents Joseph and Philomena (Samber) Sewald, grandparents William Jr. and Betty (Marostica) Dickinson, cousin Marty Ballinger, and uncle Robert "Bob" Dickinson.

In Loving Memory - Eric Nathan Leachman

DECEMBER 18, 1970 – APRIL 4, 2022

It is with great sadness that the family of Eric Nathan Leachman announce his sudden passing on April 4, 2022. Eric was born in Manhattan, Kansas, on December 18, 1970. The family moved to Bozeman, Montana, in 1973. Eric attended Monforton School and Bozeman High School. After graduation Eric served in the US Navy for six years.

Upon returning to Bozeman, Eric worked alongside his dad in the operation of Leachman Angus Ranch. Eric met his one true love and soul mate, Marlo Mangini, at the

NILE cattle show in Billings, Montana, in October 1997. They were married on June 5, 1999. In 2005, Eric and his family moved to Toston, Montana, where he and Marlo worked side-by-side continuing the Leachman Angus Ranch tradition of breeding and raising Black Angus Cattle. As their children, Abby and Wade, grew, they also became actively

involved in the ranching operation. Eric was dedicated to his role as husband, father, and steward of the land. One of his great joys was watching Abby and Wade's participation in sports and livestock events.

Eric was very active in the Broadwater 4-H community, serving as a leader in the livestock area. He was also active in the Montana Angus Association and a member of the American Angus Association. Just recently, he was serving on the board of Rocky Mountain Supply which he was enjoying and felt he was learning more about the agricultural industry. Eric loved the cattle and farming.

Eric is survived by his wife, Marlo; children, Abby and Wade; brother, Adam Leachman (wife Jen); and parents, Jay and Cheryl Leachman. A private family service was held at Dokken-Nelson Funeral Service, Bozeman, Montana.

"You were gone before we knew it and only God knew why. a million times we needed you, a million times we cried. If love could have saved you, you never would have died."

A memorial scholarship in Eric's name has been set up with Montana Junior Angus Association. Donations can be made to:

Montana Angus Association
Memo: Eric Leachman Memorial
P.O. Box 25
Whitlash, Montana 59545.

In Loving Memory - William "Bill" Davis

SEPTEMBER 25, 1947 - MAY 5, 2022

William Dale "Bill" Davis passed away at his home in Belgrade, Montana on May 5, 2022 after a three-year battle with pancreatic cancer.

Bill was born in Bozeman on September 25, 1947 to Dale and Betty Jo (Cole) Davis. Bill started school at Reese Creek (a one room schoolhouse) at the age of five. He then went to Belgrade

High School, graduating at the age of 16 in 1964. Bill graduated from Montana State University in 1968 with a BS degree in Agri Business. He played football and basketball all four years in high school and was a member of the Montana State Rodeo Team for four years, receiving the first rodeo scholarship given (\$100). Bill was also a member of the Sigma Chi Fraternity.

After graduation Bill took a job in Chowchilla, California running a cattle ranch. He continued rodeoing on his faithful horse, "Yeller". Bill won the CCA steer wrestling title before moving back to Belgrade to take over Rollin Rock Angus from his dad after the passing of his mom. Bill married Jennifer on October 15, 1983 in Pendleton, Oregon. In 1988, Rollin Rock Angus, along with PAPA Ranch, Hinman Angus and Cedar Hills Angus, had their first Performance Breeders Bull Sale. In 1993 Bill moved Rollin Rock Angus to Sidney, Montana. "The Program with a Purpose" continued, moving the 2014 sale to Eastern Oregon, Rollin Rock Genetic Partners. On March 15, 2022 was Rollin Rock Angus' 51st production sale. "The Program Continues."

Bill was a member of the Springhill Go Getters 4-H club, attended Boys State, Demolay, Belgrade Masonic Lodge, Associate Guardian for Job's Daughters, Montana Rodeo Association, Northern Rodeo Association (Director), Montana Pro Rodeo Association, Montana Rodeo Hall & Wall of Fame (Director), Montana Angus Association (Director), American Angus Association (President), Gallatin Beef Producers, Montana Stockgrowers Association (Director), Montana State Rodeo Endowment Committee (Magnificent 7), Valley Bank Board of Directors, Gallatin Association of Realtors, Montana Association of Realtors, and American Marriage Ministries.

Bill enjoyed golfing with his friends and team roping with all of us. He loved his Black Angus Cattle and his yellow horses.

He is survived by the LOVE of his life, Jennifer; daughter, Julie (Doug) McLaughlin; son, Justin; brother, Tom; sister, Patti; grandkids, Logan (Ellie), Lane, Lindsay, Stella, and Gus; great-grandkids, Paisley and Wyatt; and LOTS of cousins, nieces, nephews, and special friends.

"Every moment is a golden one for him who has the vision to recognize it as such."

In lieu of flowers, the following memorials are set up in Bill's name: American Angus Association Foundation/ Research & Education - St Joseph, MO; Montana Stockgrowers Foundation - Helena, MT; and Montana State University Foundation, Bill & Jennifer Davis Rodeo Scholarship - Bozeman, MT. Contributions can also be made to Encompass Health/Hospice of Bozeman Health.

In Loving Memory - Andrew Van Dyken

APRIL 5, 1991 - AUGUST 20, 2022

On the afternoon of August 20, God called Andy (31) home after a 5 ½ year battle with cancer. He is now in Heaven watching over the most beautiful set of Black Angus cows you can imagine.

Andrew Philip Van Dyken

was born on April 5, 1991, to Rick and Halane Van Dyken, joining his brother Kyle and his sister Heidi. His younger years were spent in the Gallatin Valley, where he attended Manhattan Christian School. He was always interested and very involved in haying, grain harvest and all things cattle. In the spring of 2006, he and his parents made the move to the Crow Creek valley.

Andy graduated from Manhattan Christian in 2009, much to the relief of the teachers. After a very short try at college, Andy returned to Toston to become more involved in the Thousand Hills Angus herd. From a very early age, Andy showed a keen interest and

AM I FULL OF CRAP?

Calf scours are not inevitable. A strong prevention program is non-negotiable. Dependable scour prevention is essential for calf welfare, employee morale and business profitability. The immune system's response to vaccination is variable and unpredictable. That's why giving preformed antibodies instead of relying on a vaccine to stimulate antibody production is so important. I'm all for removing uncertainties. So yes, I stand by this product. (And no, I'm not.)

**THE BEST VACCINE FOR SCOURS,
ISN'T A VACCINE.**

(*Andy Van Dyken Obituary Continued*) developed a very good eye for cattle. His ability to recall pedigrees, sires, and EPDs was truly amazing. He would spend countless hours each spring studying sire directories, searching for just the right mating to enhance his cowherd genetics. It was under his direction and guidance that, in 2019, Thousand Hills began holding their own production sale.

At a bull sale, (where else) Andy was introduced to Kindle McCauley by mutual friends. He proposed to Kindle in the horse barn at the Smith Ranch in Boulder, where she was doing night calving. They were married November 15, 2014 at the Kleffner Ranch in East Helena on a day where the temperature was well below zero.

Andy and Kindle were blessed with a son, Jackson Wacey, on August 17, 2015 Andy was a very proud dad, and like everything else he did, he gave his parenting job 100 percent.

In April of 2017, Andy was diagnosed with osteosarcoma, and that began the hardest battle he would face. His strength and unwavering determination to be one of the few to defeat this terrible disease was truly an inspiration to all who knew him.

After 2 rounds of chemotherapy, Andy and Kindle were blessed with their miracle baby. Otis James joined the family on April 19, 2021. Otis has that extra sparkle in his eyes, just like his dad.

Andy was preceded in death by his grandpa, Roger Van Dyken, his grandpa and grandma, Phil and Nene Flikkema, and his mother in law, Anika McCauley.

Left waiting on earth and looking to be reunited with Andy in Heaven are his wife, Kindle, sons Jackson and Otis, parents, Rick and Halane Van Dyken, his brother Kyle (daughter Kenna), his sister Heidi Kool (husband Jason, sons Bridger and Colton), his grandma Mary Anne Van Dyken, and his father in law Jim McCauley.

A celebration of Andy's life will be held Wednesday, September 7 at 10 AM at the Trailhead Church just north of Townsend. Graveside service will follow at the Radersburg cemetery. As per Andy's wishes, a potluck lunch will be served, following the services, at the Radersburg Schoolhouse. We are asking those who attend to please bring a salad or desert, and a small cooler with beverages to share. We will provide the meat.

In lieu of flowers, we would appreciate it if instead those gifts would be donated to this foundation :

Osteosarcoma Institute, 3963 Maple Avenue Suite 390, Dallas, TX 75219 <https://osinst.org/donate/>

2022 NATIONAL JUNIOR ANGUS SHOW JULY 2-9, 2022 || KANSAS CITY, MO

Helaina Fowler, Lewistown, represented Montana at the 2022 National Junior Angus Showmanship Contest, held in conjunction with the National Junior Angus Show (NJAS), July 7-9 in Kansas City, Mo. Forty-two youth from across the country competed for top honors in the 56th annual event. Photo by Pearl's Pics.

These junior members won top honors in the intermediate division of photography--people at the 2022 National Junior Angus Show (NJAS) Awards Ceremony, July 8 in Kansas City, Mo. Pictured from left are Audrey Curtin, Blue Mound, Ill., first; and Claire Murnin, Huntley, Mont., third. Photo by Pearl's Pics.

These junior members won top honors in the senior division of photography--landscape at the 2022 National Junior Angus Show (NJAS) Awards Ceremony, July 8 in Kansas City, Mo. Pictured from left are Erica Coleman, Charlo, Mont., first; Alexis Vandenberghe, Cleveland, N.D., second; and Austin Clock, Paradise, Kan., third. Photo by Pearl's Pics.

These junior members won top honors in the senior division of photography--Angus cattle at the 2022 National Junior Angus Show (NJAS) Awards Ceremony, July 8 in Kansas City, Mo. Pictured from left are Erica Coleman, Charlo, Mont., first; Anna Johnson, Durand, Ill., second; and Emma Nowotny, New Braunfels, Texas, third. Coleman also won first place overall in senior division of photography and first place in the entire photography contest. Photo by Pearl's Pics.

YOU CAN'T CONTROL THE **OUTCOME**,
BUT YOU CAN CONTROL THE **EFFORT**.

2022 NATIONAL JUNIOR ANGUS SHOW

JULY 2-9, 2022 || KANSAS CITY, MO

These junior members were overall winners in the intermediate A division of the career development contest at the 2022 National Junior Angus Show (NJAS) Awards Ceremony, July 8 in Kansas City, Mo. Pictured from left are Daniel Humpert, Windthorst, Texas, first; Dustin Denton, Blue Rapids, Kan., second; and Claire Murnin, Huntley, Mont., third. Photo by Pearl's Pics.

These junior members won top honors in the intermediate A division of the extemporaneous speaking contest at the 2022 National Junior Angus Show (NJAS) Awards Ceremony, July 8 in Kansas City, Mo. Pictured from left are Claire Murnin, Huntley, Mont., first; Lyle Perrier, Eureka, Kan., second; and Jackson McCurry, Colwich, Kan., third. Murnin received the Harvey Rattery bronze sculpture in the name of the late Pat Grote for her first place win. Photo by Pearl's Pics.

2022 LEAD CONFERENCE

Nicole Stevenson, Joliet, and Claire Murnin, Huntley, represented Montana at the 2022 LEAD (Leaders Engaged in Angus Development) Conference, July 28-31 in Lexington, Ky. A total of 100 juniors from 26 states and Canada attended the conference, "Angus takes the Triple Crown," where they enhance leadership and interpersonal skills while learning more about the beef industry.

Western Ranch Supply selected their second Future Generation Youth of the Month. Awarded to Wylee Simenson from Chinook, MT. Wylee is an extraordinary young man who is heavily involved in his community in many different aspects; from starting the community garden to helping host resident birthday parties at Sweet Memorial Nursing Home, he is always ready to lend a helping hand.

Not only is Wylee stepping up and making a difference in his community, but he is also leaving his mark on the youth in his community. Wylee uses his passion for agriculture and the show industry to give back to his community. Wylee spends his summer hosting a weekly beef and lamb showmanship and fitting clinic. Wylee has expanded this clinic from just his county to surrounding counties as well. His leadership shines through by being involved in 4-H and FFA. Wylee currently is the Chinook FFA's Reporter and his 4H club President.

When Wylee isn't busy with clinics and community involvement, he takes time to focus on his individual goals. Wylee is extremely passionate about his cattle herd and showing. He spends countless hours in the barn doing chores, helping calve, and making sure his cattle are in tip-top shape. To help advance himself in the Angus industry, Wylee is serving on the Junior Angus Association as an ambassador.

Western Ranch Supply is proud to announce a well-deserving young man as our second, Future Generation Youth of the Month. Western Ranch Supply wants to help Wylee continue his dream in agriculture by gifting him \$500.00 to help him succeed. It is Western Ranch Supply's privilege to help young agriculturalists who will be the next generation leaders in agriculture.

Customer Service- Providing health, feedlot and grid performance data for our customers for over 25 years.

Reminisce Cows- Cow herd performance starts with measuring structural soundness and disposition. If these 2 traits aren't in order, it doesn't matter how fertile she is or how big of calf she can raise.

Reminisce Bulls- Born and raised in altitudes above 7,000.' Developed on a 41 mega cal ration; Summered in big sage brush pastures to learn to travel in big country.

How Good are Your Cattle?

Bragging rights on performance begin and end on the rail. On that day you will know how healthy they were, how well they gained, how well they converted, and how well they will taste to a consumer that doesn't know you. We all sell our cattle by the pound and on that day you will be paid accordingly. Do you know how good your cattle are? Reminisce Angus customers do. They have the data. They have the bragging rights.
