53<sup>rd</sup> PRODUCTION SALE

**MARCH 3, 2026**

1:00 PM MST

At the ranch • Valier, Montana

- Performance Proven Yearling Sons
- Solid Foundation Yearling Heifers
- Bangs Vaccinated • Ready to Breed

Apex Angus remains dedicated to producing seed stock that will enhance the commercial cattlemen from "birth to plate".

The bulls and heifers offered on 3/3/2026 will keep on doing for you what they've done for years at APEX ANGUS, an honest and trustworthy job.

The Montana Angus News is the official publication of the Montana Angus Association and is available to anyone interested in Montana's Angus cattle. However, advertising is restricted to those raising Angus cattle in the state, those consigning Angus bulls to Midland Bull Test or people servicing cattlemen with their business located in Montana.

Since the magazine is not subject to subscriptions, the only feasible way it can be mailed is at bulk rate; therefore, advertising for events scheduled within 18 days of publication will be accepted only at the advertisers risk, and this publication will assume no financial responsibility for distribution on its entire circulation prior to that time.

Finally, the information contained is from sources deemed reliable, but is not guaranteed.

For details on subscriptions and advertising please contact:

Jesse Thompson  
406.450.3429  
PO Box 25 • Whitlash, MT 59545  
montanaangusnews@mtangus.org

Printing:

Angus enthusiasts,

Putting this Directory together is one of my favorite projects of the year, and also my biggest. But the amount of time and effort that goes into producing this Annual publication is worth it because this issue is full of the breeders that are the heart and soul of not only the Angus community in Montana, but also the people that help this Association to be as successful as it is today. In putting together the Montana Angus Tour portion of this Directory, it thrills me to learn the history of each operation and meet the folks behind each one of these hard working ranches.

In this issue, you'll find detailed information about the 2025 Montana Angus Tour, which will be hosted out of Butte, MT, from September 30-October 2, 2025. This tour is a fantastic opportunity to meet fellow breeders, exchange ideas, and witness the exceptional Angus operations in Montana. It could be sunny and 75 or we could have 2 feet of snow so please be prepared to dress for the weather. Even 4" + of rain didn't keep the tour from hitting all the stops in Lewistown last fall. Included are bios of the tour hosts, providing insight into their operations and contributions to the Angus community.

The board members, volunteers, past presidents and secretaries of the Montana Angus Association are proud to support the Angus community and be a part of an industry that values quality, integrity, and innovation. I encourage you to reach out to these breeders, visit their operations, and see firsthand the passion and expertise that goes into raising top-quality Angus cattle.

Thank you for your continued support, and we look forward to serving you in the years to come.

Happy Trails,

Jesse Thompson

MILES CITY LIVESTOCK COMMISSION MILES CITY, MONTANA

SITZ INCENTIVE 704H

RFM

RON FRYE MARKETING  
406.600.7514

Incentive Sons continue to top sales in Montana, Nebraska and the Dakotas, while his daughters catch eyes in any herd. Impressive foot scores, combined with a solid EPD lineup, Incentive genetics touch the essential bases for beef production in nearly all environments.

Vermilion B2 boasts an exceptional EPD spread from birth to yearling, and has proven himself a heifer bull; this Bomber son excels with impressive carcass scores and sound feet. He adds frame and stretch to his progeny.

In this day and age of DNA, EPDs, and \$Values—tools we use in all our breeding decisions—we remain guided by the traits we see every day. Between Billy and myself, we bring over 80 years of experience breeding registered Angus cattle, and that experience matters. It allows us to confidently tell our customers that these daughters will excel in performance, possess strong feet, display excellent udders, and offer tremendous longevity. A pedigree is more than just what's written on paper—it's the program and experience behind it.

## Beef Country Genetics Sale

One of the largest Efficiency Tested  
bull sales in North America

**DECEMBER 3, 2025**

WEDNESDAY - 1:00 PM  
Midland Bull Test, Columbus, MT

150 Fall and Coming Two-Year-Old Bulls

### Do the Math!

Efficiency-proven genetics offer up to 20% more savings on the cow herd... and 20% more savings in the feedlot, while still maintaining the same weaning weights.

It doesn't cost you any more than making sure you are using the right bulls and the right program.

**MATERNAL** Research from Canada, Australia, Texas A&M, University of Florida, Montana State University - Dr. John Patterson, University of Missouri, University of Illinois... have all shown efficiency gains of 10-20% in females tested to be negative RFI or sired by negative RFI bulls with no impact on weaning weight, fertility or yearling weight.

*"By stacking generations selected for RFI improvement, greater than 20% in production efficiency can be achieved."*

- Dr. Monty Kerley

That's over \$100/head savings in pasture and wintering costs.

**STOCKER-GRASS** A 20% savings in wintering and pasture costs can easily yield another \$50-\$70/head.

**FEEDLOT** Improvements in feed conversion have been proven up to 20%. Just a 15% improvement would be over \$130/head savings.

### Beef Country Genetics offer...

### **Stevenson's Down T Angus**

Darrell & Sara Stevenson

428 Birky Rd. • White Sulphur Springs, MT 59645

stevenson.darrell@yahoo.com

(406) 350-5443 • (406) 366-0152

www.StevensonDownT.com

Stevenson Down T Angus is a fourth generation registered Angus ranch. Darrell and Sara Stevenson were an integral part of Stevenson Angus Ranch for twenty-five years before expanding to their own ranch in the beautiful valley near White Sulphur Springs.

In 2010, Darrell was presented an opportunity in Russia. It was a landmark venture with two Russian businessmen and together as Stevenson Sputnik they established a core nucleus registered herd, a large commercial herd, feed yard and small-scale abattoir to become one of the preeminent beef production units in the country. It was totally vertically integrated from production to retail. In conjunction, Darrell assisted with several other live cattle shipments to Kazakhstan, Uzbekistan, and Kyrgyzstan. This window of opportunity was limited and by 2017 there was an opportunity to divest in his Russian holdings. Although complicated, the sale of Stevenson Sputnik was successfully finalized. The cattle and holdings continue today and is currently the second largest beef production unit in Russia.

Through that same timeframe, Darrell and Sara were able to start building some cow numbers home in Montana. Sara and the kids, CJ and Claire, oversaw that growing concern while Darrell spent many months overseas managing Stevenson Sputnik and servicing the ongoing demand for Angus cattle in those emerging Central Asian markets.

The upside-down T (Down T) brand was procured by Darrell and Sara as a young married couple. Their dream of one day having their own place started to come together. Their initial growth took place on the

Sage Creek unit near Denton, MT. It was remote, tough country and Sage Creek's lease terms were limited. In time and out of necessity, cow numbers grew and another more stable option was needed.

Through the help and guidance from Sara's parents, Dewey and Rosana Skelton, the Stevenson Down T was able to permanently settle in Meagher County in 2019. Located south of White Sulphur Springs, MT on the South Fork of the Smith River.

The Stevenson family roots run deep in Central Montana and Angus cattle. The family settled near Hobson in 1906 and the first registered Angus cattle were purchased in 1947. As a Charter Member of the Montana Angus Association, Grandfather Jamie Stevenson established a legacy that now continues through several different family units. Stevenson Angus Ranch's first bull sale was in 1961. Today it is considered the longest established annual bull sale in America. Darrell's parents, Keith and Roberta Stevenson took over those reins in 1976 and continues today with his brothers Bob and Jake and their families.

Darrell and Sara are very proud to continue the family legacy with their own version of that tradition. Currently, son CJ is serving with US Army Special Operation Forces and daughter Claire recently graduated with her master's degree in Animal and Dairy Science from the University of Georgia. The family is excited to welcome her and her future husband Avery De Mello home to the ranch this fall.

Set in a mountain valley at 5000', growing seasons are short, and winters are long. Only good cattle perform, they have got to be easy fleshing, sound footed and fertile. In trying to work with mother nature, they now calve later spring and develop bulls into a more mature age group. The Stevenson Down T bulls are still marketed with Stevenson Angus Ranch at the Hobson headquarter sale barn. Together they host two sales a year. The fall offering is the Tuesday after Thanksgiving in Hobson, and the spring sale is the first Sunday in March at the White Sulphur Springs Ranch.

### **Mile-Hi Ranch**

Will Malcolm & Asha Malcolm

28 Cokedale • Livingston, MT 59047

ashamalcolm2003@gmail.com

sleepinggiantgenetics@gmail.com

(406) 223-1657 • (406) 223-2235

Malcolm Mile-Hi Ranch was established as a commercial cow/calf operation in the 1930s. Through five generations the ranch has continued in Paradise Valley with a small relocation in 1991 to the West side of Livingston. Will Malcolm is the fourth generation to work the ranch and in 2010 decided to focus his efforts on raising quality seed stock cattle. In 2016 he was joined by his daughters Asha and Audrey in this mission.

Will has carried traditions on in various aspects of his life including following in his mom and dad's footsteps by attending Montana State University. Go Cats! He received his B.S. in Animal Science and decided to start a career in cattle reproduction. You may know his company, Sleeping Giant Genetics. His passion for the cattle industry and the opportunities it held led to him switching the family ranch from primarily commercial cattle to a registered seed stock operation. He married Sabrina in 1999 and they have three children: Audrey, Asha, and Reid. Reid and his wife Gracie are each pursuing a degree in aeronautical science and psychology respectively in Billings. Audrey went to Montana State University and graduated in 2024 with a degree in Elementary Education. She teaches 1st and 2nd grade at a school in Livingston and is a part owner in the ranch and shares in day-to-day management activities. Asha attended Montana State University as well, graduating in 2024 with a degree in Animal Science and is currently starting her second year of law school. She owns several of the females and manages much of the registration and marketing of the ranch.

Due to the nature of Will's profession, we utilize embryo transfer and A.I. heavily within our herd. Through selection of our donors from tremendous programs such as Coleman Angus, Hilltop Angus, and Trexler Angus we feel the quality of our herd has helped us serve our customer base well. We utilize tried and true genetics, with many of our replacement females sired by the outstanding OCC Juneau 807J, SAV Renown, and Coleman Bravo. Replacement Females can also be traced back to the powerhouse dams BT Everelda Entense 613L, Coleman Donna 1270, Sitz Forever Lady 612T, and Hilltop Cinderella 39. This doesn't mean that we don't utilize new genetics to keep up with new industry challenges, we routinely add new donors to our lineup such as MH Donna 808, SAV Madame Pride 3835, and our new standout MH Everelda Entense 081. We are constantly on the lookout for ways to improve the quality of our product and make sure our cattle work in whatever situation you put them in.

We are passionate about providing ranchers with cattle that work in every environment. With rising expenses and an aging workforce in the cattle industry it is important to us that we provide cattle that work well with very little input for all types of operations. We have focused on building our female line to make easy-fleshing, well muscled and good footed cattle. We balance low PAP and High SM EPDs with phenotypic excellence. This, by extension, has led our bulls to work well for our clients and create great replacement females and consistent steer calves. Every year we host a private treaty bull sale the second Saturday in March, offering mature yearling and age advantaged 18-month old bulls. We also sell embryos year-round. We are excited for you to view our cattle in the upcoming 2025 Montana Angus Tour. The Malcolm Mile-Hi Ranch looks forward to serving you in the future.

### **Fort Logan Ranch**

Samuel & Chennell Berg  
1698 MT Hwy 360  
White Sulphur Springs, MT 59645  
flranch@gmail.com • (406) 547-4366  
www.FortLoganRanch.com

The Berg family has been ranching at Fort Logan since 1945. George and Ellen Berg took over management in 1975, followed by Sam and

Chennell in 2010. We have been utilizing AI since 1978 and started an ET program in 2020. Our focus has been on making the highly productive and efficient mother cow. Our cows run out in the hills around Meagher County until January then start calving the first of April. All cows are either AI'd or used as a recip starting in mid June and wrapping up in early July. We believe in having cattle with good temperament, structure, fertility, and take a balanced approach when choosing our genetics.

### **WEDNESDAY, OCTOBER 1<sup>ST</sup>**

### **Timber Line Ranch**

Jake & Jane Callantine • Cate & Curtis Doubet  
3655 Flathead Pass Rd. • Belgrade, MT 59714  
tlrangus@gmail.com • www.TimberLineAngus.com  
(406) 581-4764 • (406) 581-5931

Timber Line Ranch has been producing Angus Cattle since 1948. Located 25 miles north of Bozeman, Montana, the ranch sits at the foot of the Flathead Pass of the Bridger Mountain Range. The ranch was homesteaded in 1882. Jake is the fourth generation to ranch here. He does so with his wife Jane and daughters Cate, her family and Krista. Cate is currently employed as a video specialist with Angus Media. She and her husband and their three girls run Hereford, Simmental, and Optimizer as Doubet Cattle. Krista lives in Billings, Montana and is a lab technician for World West Sire Services but spends most of her spare time helping at the Ranch. All are an integral part of the operation.

The Callantines run 240 mother cows and sell registered bulls and commercial heifers in their annual Bred for Business Bull Sale the third Friday in April. They strive to maintain a functional and performance driven cowherd. They make sure to use herd bulls that give them a consistent calf crop, improving each year. This along with 40+ years of utilizing AI and embryo transfer has allowed them the opportunity to continually and consistently improve the quality of their cowherd. With foot quality and structure at the front of their minds they work to improve weaning weights, while keeping birth weights and in check.

All their efforts are focused on building the type of cattle that keep them and their customers in business.

The challenges of ranching in an ever increasing urban environment become more and more complicated every day. However, this is still "God's Country" to the Callantines and they graciously welcome you to Southwest Montana.

### **Veltkamp Angus**

Darin & Gloria Veltkamp • Codey Veltkamp  
6485 Highline Rd • Manhattan, MT 59741  
dveltkamp@hotmail.com • www.VeltkampAngus.com  
(406) 539-8564 • (406) 577-6304

Greetings from Veltkamp Angus and welcome to the South Montana Angus Tour! We are a family run operation started in 1979. Darin and Gloria along with our kids, Codey, Alex, Justin, and Sam make up the crew. I like to think of our crew as the "A Team". Our cow herd consists of 300 registered mama cows, and we also have a commercial replacement heifer program where 450 heifers are bred and sold each year. Our cattle are summered on leased mountain pastures where they stay until the snow gets too deep. We winter our cattle in the Gallatin Valley where we also raise our own hay, corn, and wheat on 1000 acres of irrigated farm ground. We have our annual bull sale on the second Tuesday in March, and the bred heifers are sold in December. We look forward to visiting with you on the tour.

### **Van Dyke Angus Ranch**

Lee Van Dyke • Tim Crabtree • Tom & Sherry Wulff  
8295 Highline Rd. • Manattan, MT 59741  
lvandyke@vdar.com • tcrabtree@vdar.com  
(406) 579-0798 • (406) 579-2585  
www.VDAR.com

Seventy years ago, in 1955, Clarence Van Dyke bought 35 head of registered Angus cows and Van Dyke Angus Ranch was born. Clarence's attention to detail and meticulous record-keeping led to VDAR being on the leading edge of many innovations, including AI and performance testing. These management tools, along with our selection criteria, set us up to have phenomenal success in the newly established and just released Functional Longevity EPD.

Through the years, all three of Clarence's sons were involved in the cattle operation; currently, Lee remains at the helm with Tom Wulff

and Lee's son-in-law, Tim Crabtree. Over 70 years of breeding cattle, there have been changes too numerous to count in both the Angus breed and the cattle industry, but one thing that never changed in our eyes is what makes a good bull.

Clarence was known for saying, "The first thing a bull has to do is make a good cow. If he can't do that, he's no good." VDAR has faithfully lived by that philosophy and for the last 20 years, we have held our cows to a strict, no-excuses 45-day calving window... every cow, every year! Proper culling and disciplined breeding decisions, based around the ideas of function and longevity, have been the backbone of our program for decades. Sometimes the hardest, but best thing we can do for the cow herd, is to simply not make exceptions for our cattle. Over the years, holding our cattle to the narrow calving window as well as key basic performance standards to remain in the herd has whittled out cow families, dictated frame score, and improved feet; while the growing age and dwindling speed of Lee and Tom has improved disposition. We believe in our cattle and the results that we see them deliver across the country year after year. EPD's have never been a big selection criterion for us, mainly due to the simple question: "What is a 'good' EPD?" Instead, we have based our decisions around pedigree and phenotype rather than EPDs.

So, what makes a good cow at VDAR? Well, for starters a pedigree loaded up with cattle who produced well beyond 6 years (or the breakeven point in the industry). If they stayed here longer than that, they proved their fertility, structural soundness and mothering ability. They maintained a 365-day calving interval, never had their feet trimmed and did their job every year with as little involvement from us as possible.

When you visit VDAR in Manhattan, you'll see first hand the cows who have done this year after year, including VDAR Chloe 9727, the 16-year-old dam of VDAR Cedar Wind 8111, whose progeny dominates the new Functional Longevity EPD. VDAR is the breeder of 7 of the top 50 bulls in the breed according to the current Angus Sire Evaluation. Cedar Wind is one of those bulls, while another 4 of them are sons or grandsons of his. 9727 herself can account for 10% of the top 50 bulls in the Sire Evaluation and has never been flushed. She's maintained a 366-day calving interval and never had the need for an excuse in her life.

Who knew that 70 years ago, when Clarence Van Dyke bought those 35 head, that today Van Dyke Angus Ranch would be ranked so highly in the new Functional Longevity EPD? While the Functional Longevity EPD may be new, we invite you to come see the cows who have been proving it for decades by "doing their jobs" at VDAR..."Montana's Original Maternal Herd!"

### **Kimm Angus**

Tom Kimm • Riley Kimm  
8620 Highline Rd. • Manhattan, MT 59741  
tdkimm@gmail.com  
(406) 209-2653 • (406) 580-6172

Kimm Angus would like to welcome you to the 2025 Montana Angus tour. This year we will be displaying some of our top cows and bred heifers at Van Dyke Angus Ranch in Manhattan.

Kimm Angus is a 4th generation family owned and operated ranch that started in 1948 and is Located 14 miles south of Manhattan. In 1989 we purchased our first registered Black Angus females from Van Dyke Angus Ranch. In 1991, we bought a heifer out of the Miss Wix cow family from McCumber Angus Ranch in North Dakota. With these three females as our foundation and the use of A.I. we have expanded our herd to 300 cows and 60 replacement heifers. We have developed our cow herd with the criteria that they be structurally sound, good utters, good feet and a quiet disposition with an emphasis on fertility. Our goal is to produce easy flushing cattle with strong maternal traits because we believe our future rests firmly with the Angus female.

We market 60 to 70 bulls a year through our "Focus on the Factory" bull sale at Headwaters Livestock Auction in Three Forks Montana, the first Saturday in March. Our goal is to offer only our top end bulls to our customers. We also market select females by private treaty and will have 80 to 90 bred heifers available to sell in November.

We would rather talk about our cattle than write about them so we would love to have you stop and visit anytime. Thank you for being a part of the tour.

### **Thousand Hills Angus**

Rick & Halane VanDyken Family  
85 Lone Mountain Rd. • Toston, MT 59643  
blkcattle@aol.com • www.ThousandHillsAngus.com  
(506) 581-2078

Welcome to the 2025 Montana Angus Tour. We are thankful you have taken the time from your busy schedule to travel to South Montana. Hopefully you enjoy our beautiful scenery and get to reconnect with old friends. Oh, and get to see some of the best cattle in the world.

Our Angus story starts in 1981 at the Van Dyke Angus sale. It was there I purchased three heifers and started what, at the time, was Riverfront Angus, on the banks of the Gallatin River, southwest of Belgrade. I went to Farm Credit Services and got a loan. Interest was 18%. I worked for a neighboring potato farmer, which helped pay some of the interest. Over the next 3 years, I added more heifers from the Van Dyke and

Hyline herds.

From that base, I began building our Angus Herd. Some of the sires we used early in our program were Early Sunset Emulous 60E, PS Power

Play, and GDAR Rito 2100. Bulls were marketed through the South Montana Sale. Since we were keeping a high percentage of our heifers as replacements, the emphasis was always on using bulls that would leave good females. Other sires we used as we continued to expand over the years were VDAR New Trend 315, Hyline Right Time 338, and Hero 626 of R R 2418.

In 2006, we lost our land lease and decided to move our operation out of the Gallatin Valley to our current location, halfway between Bozeman and Helena. At that time, we changed the name of our operation to Thousand Hills Angus. Psalm 50:10 "He owns the cattle on a thousand hills."

About this time, we became interested in the Cole Creek Black Cedar bull. One of his sons we raised topped the South Montana sale, selling to the Heide ranch in Boulder. TH Black Cash 1013 became a herd changer for us. His daughters were everything a person could want in a cow. 15 years later, we have people who used him in the past, buying semen because they like the cows so well.

In 2017, we decided to sample S Chisum 255. Are we ever glad we did! From that trial, came another sale topper at South Montana. TH Gunsmoke 255 sold to McCauley Ranch in Cut Bank. God was watching out for us because we lost him to a bone infection in 2020 but had collected quite a bit of semen on him.

His daughters are as good as they get. They are good footed, with really nice teat and udders. His docility EPD is in the top 3% in the breed Heifer pregnancy is top 20%, and Functional Longevity is top 15% and it reflects what we see. SM is +104 which is top 2%. Our AI technician liked the daughters so much, she ordered semen on him to use on her cows. His dam will be on display at our stop. She is now 11 years old and as you will see, her udder and feet are still great. She's as close to the ideal Angus cow as we've found.

Our cows run on leased grass in the summer. The bull calves are on a couple of private leases on the divide between Townsend and White Sulphur. Its mountain pasture at about 6000 feet. Heifer pairs run on a private lease with a little BLM ground. It's on 10 Mile Creek just west of Helena. There is about 30 acres of creek bottom, and from there it is uphill. Its steep, rocky, and dry, but they always come home looking great.

I would be remiss if I didn't give credit where credit is due. Many of our later breeding decisions were the result of much study and contemplation by our son, Andy. He had a great eye for cattle and seemed to have a sixth sense for breeding cattle. It was under his urging that we decided to take the leap forward and hold our own production sale in 2019 and we haven't looked back. We hosted our 7th Annual "Maternally Minded Genetics" sale this year. It's always the second Saturday in March at Headwaters Livestock Auction

Sire groups that will be on display at our stop are TH Gunsmoke 255 and a son TH Gunsmoke 0722, Sitz Incentive704H, and a son we bought from Heikens, Heiken Incentive2030, LT Chiefton, LT Chosen, and Pine Coulee Resource G708.

We hope to have bull calves on display at our stop. Due to the location of the grass the bull pairs run on, logistically, it's not possible to bring the cows in. We will also have some heifer pairs, so you will get an idea of what our cows look like. We will have replacement heifers on display, along with our herd sires: TH Gunsmoke 0722, Heiken Incentive 2030, and two bulls we added this past spring, half-brothers out of AAR Load Up J277. One is from Whistling Winds Angus, WW Load Up 4377, and the other is from Arntzen's, AAR Load Up M118. We are really looking forward to seeing how these two bulls move our program forward.

Thanks again for taking the time to attend the tour and we look forward to seeing you for lunch at Headwaters Livestock on Oct 1.

Note: It was at the 2017 Montana Angus tour that so many of you showed your support for our family. It was only a few months after Andy had been diagnosed with osteo- sarcoma. God called Andy home August 20, 2022. The outpouring of support from the Angus community will never be forgotten. Words cannot express the thanks and love we have for you all. We're looking forward to the time we will be reunited, but in the meantime we will continue to carry on the legacy he started.

### **MSU Angus**

Dr. Tim Delcurto

Montana State University • Bozeman, MT 59715

timothy.delurto@montana.edu

(541) 910-8970 • (406) 994-3708

The MSU Angus Program represents a partnership between the members of the Montana Angus Association and the Department of Animal & Range Sciences. The MSU Angus Program began in 2018/2019 with the donation of 50 registered heifers to the campus units. Through the donation of embryos and fund-raising efforts, the MSU Herd now totals approximately 100 hd of mature cows with 30 replacement yearly heifers. Our goal is to convert our entire herd (250 females) to registered Angus cattle over the next 3 to 5 years. This collaboration has greatly enhanced our undergraduate and graduate programs. Undergraduate students now get hands-on opportunities to evaluate bulls, replacement females, and performance records across several courses. In addition, this collaboration has also improved research opportunities for our graduate programs. To date, we have published 5 refereed manuscripts related to EPDs specific to feet and leg conformation and pulmonary arterial pressure (PAP). We also

have additional papers in progress that would not have been possible without this collaboration.

Our program is unique in that we calve in May and strive to graze the mature cows for at least 10 months each year. In other words, we have implemented a low-input production system that keeps cows in "their working clothes" for most of the year. Much of our research focuses on strategic supplementation of cattle in fall/winter environments with the goal of becoming more precise in the fall/winter management of cattle. We strive to only use Montana Angus Genetics and select cattle based on a suite of EPDs that are designed to optimize beef cattle production on limited nutrition extensive rangeland environments (Red Bluff Research Center, Norris MT). Our presentation for the Angus Tour will focus on our gratitude to the Montana Angus Association membership and the basic goals of the MSU Angus Program.

### **Hamilton Angus**

Thomas & Kylie Hamilton

211 N Pine St. • Townsend, MT 59644

hamiltonangusranch@gmail.com

(541) 403-4163

www.HamiltonAngusRanch.com

Hamilton Angus Ranch is a family run seedstock operation based out of Townsend, MT that began 15 years ago, when we purchased our first registered Angus cattle. We are fortunate to work with family on a daily basis as we currently have four generations on the ranch with all family members being involved in some aspect of the operation. Tom and Patsy Hamilton started the registered herd in Southern Idaho with the help of their son Brett. Since then more cattle have made their way to Montana where Thomas and Kylie Hamilton call home and manage a majority of the spring calving registered herd with the help of other family members.

Over the last 15 years we have worked to add value to our cattle by utilizing an extensive AI and embryo transfer program in our own herd as well as working with cooperator herds throughout the country. During this time, we have searched the country for females and cow families to add to our program that we feel are both genetically and phenotypically ideal for our breeding goals. At Hamilton Angus Ranch, we are focused on producing bulls for commercial cattlemen throughout the country who aim to capitalize on maternal based cattle with performance and carcass value. These cattle are bred to thrive in the western environment and have been selected for traits such as udder and foot quality, docility, mothering ability, growth, and carcass value which we believe are of vital importance to cattlemen today. We

currently market our bulls both through the South Montana Angus Sale and private treaty offerings.

Our passion and love for Angus cattle has grown over the last 15 years as we are grateful to not only work with some of the best cattle in the world but people. We have met many great people in the Angus business over the years with many of them becoming lifelong friends. We would like to thank all of you for taking the time to learn about our operation and evaluate our cattle on the Angus tour. Please feel free to reach out to us at any time as we look forward to meeting other Angus enthusiasts in the near future!

### **Hollow Top Angus**

Porter Bennett & Carolyn Quan  
Chace Iverson, Ranch Manager  
462 Pony Rd. • Pony, MT 59747  
pbennett@hollowtopangus.com  
(303) 513-9058 • (208) 365-8862  
www.HollowTopAngus.com

Hello and welcome to the Montana Angus Tour and Hollow Top Angus. In 2011 Porter and Carolyn purchased the Hollow Top ranch and began a journey that, over the subsequent nine years, resulted in the reassembly of a historic ranch that had been disassembled in previous decades. The ranch now spans approximately 8,000 acres of grass-covered mountain hillsides, creek valleys, and irrigated pastures, located just east of Pony, MT, and maintains around 550-600 females.

The ranch's topography provides the ideal setting to achieve the family's goals: to develop upcoming 2-year-old bulls that perform well at elevation, are practically sized, and built with enough structural integrity and power to allow extensive travel across rugged, mountainous terrain. As you will see, our cattle spend the summer months at elevation, feeding almost exclusively on mountain grasses with minimal support. As a result, they arrive fit for sale and ready to work upon delivery. Additionally, with our multi-generational family-friendly ranch, we don't tolerate docility issues: if they are cranky, they go to town.

Our cowherd is maternally focused, with emphasis on fertility, longevity, and soundness. While we established and built the herd around some of the area's most established herds like Sitz and Hinman Angus, we have utilized embryo transfer and AI, along with a no-nonsense development model, which includes PAP-testing, to raise the quality and performance of the herd.

Our production sale is held on the second Monday of December. We sell approximately 110 PAP-tested, coming two-year old bulls, along with bred heifers and cows.

Again, we welcome you to this remarkably beautiful portion of Montana and look forward to talking with you on the Tour.

### **Sitz Angus**

Jim & Tammi Sitz • Bob Sitz  
37 Sitz Lane • Harrison, MT 59735  
9100 MT Hwy 91 N • Dillon, MT 59725  
sitzangusranch@gmail.com • jimsitz1@gmail.com  
(406) 581-9153 • (406) 925-9888 • (406) 683-5277  
www.SitzAngus.com

Rooted in Southwest Montana, the Sitz Angus Ranch is a multi-generational family operation built on a foundation of hard work, integrity, and an unwavering commitment to raising industry-leading Black Angus cattle. For decades, the Sitz family has stewarded both the land and livestock with a deep respect for tradition and an eye toward innovation.

Our ranching legacy began in 1923 when Will and Frieda Sitz purchased a herd of registered Angus cattle in the Nebraska Sandhills. In 1952, the family relocated to Longmont, Colorado, with their son, Bob (Sr.). In 1959, two years after Bob married Donna Scriffany, they purchased a ranch in Harrison, Montana. Over the years, the ranch has grown into one of the most respected seedstock operations in the country. From sunup to sundown, every member of the Sitz family plays a crucial role in the ranch's success—whether it's horseback in the hills, fine-tuning genetics in the office, or sharing a meal at the table after a long day's work. We believe in doing things the right way: raising honest cattle for honest ranchers.

Today, Bob (Jr.) Sitz is located in Harrison, MT, alongside his two children, Taylre (Brett) Zempel and Lane (Haley) Sitz. Jim and Tammi Sitz operate out of Dillon, MT, where their children—Tyler Sitz, Tucker Sitz, Amber (Nolan) Konen, Ashley (Conner) Bokma, and their daughter Collins Bokma—are also involved.

At the heart of our program is a dedication to quality, consistency, and customer success. We focus on traits that matter—fertility, performance, maternal excellence, and structural soundness—because we know the kind of cattle our customers depend on to keep their operations thriving.

Sitz Angus isn't just where we work. It's where we live, raise our families, and continue the legacy for the next generation. We are proud of where we come from, who we serve, and the cattle we stand behind.

### **KG Ranch**

Paul & Kaye Doddridge  
Cody Jackson, Manager  
110 KG Ranch Rd. • Three Forks, MT 59752  
paul@kgranch.com • www.KGRanch.com  
(406) 285-3660 • (406) 580-7366

KG Ranch is owned by Paul and Kaye Doddridge.

Located southwest of the town of Three Forks, the ranch boasts miles of the Jefferson River running through it.

KG Ranch was established in 1978. Our first registered Angus females were purchased in 1980 from Rollin' Rock Angus. Those females sent KG Ranch on a 45-year Angus journey to where we are today. We currently run 800 head of registered Angus cows. Our genetics are strongly Montana-based and have been since our inception.

The KG Ranch Bull Sale takes place the first Friday in December. The sale consists of 250 coming two-year-old bulls and 150 bred heifers. Occasionally, we'll add an older age group or two of cows. We've been blessed with a fabulous base of commercial customers that make all the struggles of running a purebred outfit and putting on a bull sale worth it!

KG Ranch has raised several sires with national notoriety—KG High Regard, purchased by Hinman Angus; KG Solution, purchased by Richard Ranch; and most notably, KG Justified, purchased by Gartner-Denowh Angus Ranch and Arntzen Angus Ranch (leased to Genex Coop). We are proud to say that each year, many of our bulls are selected by Angus breeders to further their genetics.

The men behind the logo:

Greg Strohecker managed the ranch for over 40 years. Alongside Mr. Doddridge, he helped create one of the largest purebred Angus herds in Montana. They shared a vision—to establish a ranch that the Doddridge family could be proud of for generations and that would also be a leader in the community. Greg retired a couple of years ago (or let's say, semi-retired). He still helps out during AI season, on water projects, and at the annual Bull Sale.

Today, KG Ranch is managed by Cody Jackson, a KG Ranch employee for over twenty years. The cowherd is managed by Scott Clarke, also with over twenty years at the ranch.

When not out cutting, you'll find Mr. Doddridge in the office every morning, bright and early. His passion for the Angus breed and ranching in general has not wavered in the decades he has owned KG Ranch.

We are very excited to be a part of the Montana Angus Tour '25. We hope you'll join us as we help showcase one of the great purebred Angus areas in all the land.

THREE FORKS, MONTANA  
406-580-6973 406-580-6579

### **Elmore Angus**

Mike & Cathy Elmore • Casey Elmore  
18880 Schuringa Ln. • Three Forks, MT 59752  
elmoremike@gmail.com • celmore@aol.com  
(406) 580-6973 • (406) 580-6479

The ranch is located three miles south of Three Forks which is at the west end of the rich and pristine Gallatin Valley. Three Forks is also known as the Headwaters of the Missouri River. Three rivers join here, and their names are the Gallatin, Jefferson, and Madison. Visit this site if you can.

Our ranch consists of 2700 acres of which four hundred acres are irrigated with pivots and wheel lines, and the rest is dry land pasture. It was homesteaded in 1911 by my great grandfather, and we celebrate 114 years as a family ranch this year. We calve out 250 mother cows of which 150 are registered and the rest are commercial. We sell our bulls at the South Montana Angus Association Performance Bull Test which is the oldest association in the state celebrating 71 years next year, the third Saturday of March.

We also started selling a bred heifer or two at the Nile Female Sale in October. Needless to say, we are remarkably busy with all aspects of the Ag industry.

Casey and Niki are here on the ranch with Cathy and me. Jodi and Ty are still in East Helena with our three grand kids. Ashtyn (16) and twins Mykal and Trace who are thirteen.

We still strive for long, thick, high performance strong maternal, no-nonsense cattle that will increase your bottom-line. They are the backbone of our operation and a real asset to the beautiful scenery of our part of the Big Sky country.

Last but not least we want to thank Paul, Greg, Cody, and the KG crew for allowing us to display our small exhibit at the KG Ranch facility.

### **Armstrong Angus**

Chad & Trista Armstrong  
55 Cemetery Hill Rd. • Cardwell, MT 59721  
armstrongangus@live.com • www.ArmstrongAngusRanch.com  
(406) 224-0586

Armstrong Angus Ranch is a third and fourth generation ranch. George Melvin Armstrong Senior was diagnosed with MS when George Jr. was in high school. George Jr. took over the ranch and worked for the Forest Service to supplement the ranch. The ranch is now run by George

Jr.'s son Chad and wife Trista and the fourth generation: Kyra Armstrong, Klancy and his wife Emmie.

In the early 70's in order to compare breed traits George Jr. purchased some purebred shorthorn, Hereford, and Angus cows to add to the existing herd. Deciding that Angus was the most self-sufficient and profitable, it became the focus breed. In 1975 three registered Angus heifers were purchased from George Jr.'s uncle (Dudley Ballard) followed by 5 heifers from Sitz Angus. The Sitz Barbaramere heifer has been a big influence to our cow herd. The Rose family from Charlie and Jeff Younkin has been a top cow family also.

Our goals from the beginning have been to focus on fertility, longevity, mothering ability, and calf vigor. Cows must have a good disposition and mother their calves. Calves must get up and suck on their own or they are castrated. We do try to improve performance traits, but are very cautious of sacrificing our basic function, maternal traits. Our cows typically go on grass around May 15 on mostly high mountain pasture until October 1st when the calves are weaned. The cows go out on grass until January (weather permitting) until they start to calve. We currently run about 300 registered cows and 150 commercial cows which are predominantly Angus. We market around 70 two year old, mostly forage developed bulls and around 10 select yearling heifer bulls as well as 50 bred heifers on the second Wednesday of December.

We have always tried to raise the most functional and profitable cattle possible whether through AI or bull selection. We have found that the most profitable cattle have not always been the most popular or the ones with the "best EPD's". It has appeared to us that many modern Angus bulls do not seem to breed as many cows as they used too. We have also been disappointed with structure issues and inaccuracies in the EPD's with many popular bulls. We are now breeding many of our registered cows to our raised yearling bulls. This way we can see which bulls are breeding the most cows (libido) and more closely monitor structure, disposition and functionality. We still AI our heifers and about 80 cows to a few select bulls to check our progress with what is available and what has worked well for us in the past.

We thank our Lord and Savior Jesus Christ for allowing us to serve him by raising our family and doing what we love.

## Circle L Angus

Cory & Kari Lamey

8572 MT-324 • Dillon, MT 59752

circlelanguis@yahoo.com • www.CircleLAngus.com

(406) 491-7363

Founded in 2002, Circle L Angus is dedicated to producing high quality Black Angus genetics. Built from a strong maternal base, they concentrate on breeding functional, deep-ribbed cattle with strong phenotype and good structure, including predictable PAP.

Circle L Angus is solely owned and operated by the Cory & Kari Lamey family; son Cooper runs the feedlot and the properties near Glen, Montana; Daughter Cierra & her husband Charlie Switzer manage the day-to-day ranch operations at the ranch. The operation consists of spring and fall calving programs, allowing them to offer yearling and long-yearling bulls as well as females in their annual February production sale. In addition, they run a spring calving commercial herd.

Beginning in 1990, the first registered Angus females were purchased. By 2002, Circle L Angus was established when they acquired outstanding foundation genetics include BT Everelda Entense 595L, Stevenson Enchantress 561C and Sinclair Lady 5ET1. Later, they added JVC Altune of Conanga 803, CCA Countess 061, ACF Blackbird 3058 and Circle L Lady 920W. The marketing of this progeny began via private treaty with the first bull sale taking place in 2008 and they greatly anticipate their 18th Production Sale in February of 2026.

Circle L Angus has established itself as a front runner in providing the high-altitude rancher reliable PAP-tested bulls. It is worth mentioning that brisket disease is increasingly observed in cattle at lower elevation as well. This is likely due to right-side heart failure, a consequence of pulmonary hypertension.

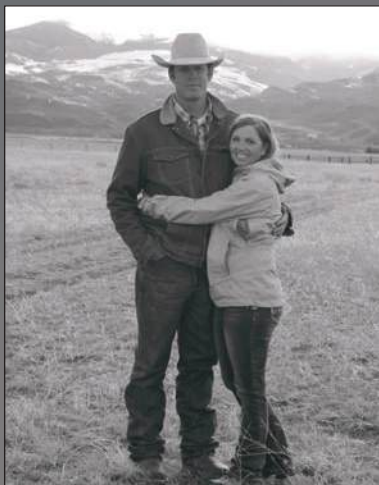

Calving ease sires Circle L Gus and his sons, Landmark, Gusto and Centennial have made their mark in the PAP world. Next, came Circle L Silver Bow, offering calving ease, high marbling and PAP. The purchase of AAR Essential in 2020 brought out cross genetics in a multi trait package. He produced Circle L Unified, the high selling bull of our 2024 sale selected by Vermilion Ranch as well as the second high-seller, Circle L Vital, who was selected by ABS Global and Double RL Cattle Company of Colorado. There is much excitement about these up-and-coming herd bull prospects that are garnering widespread interest. There are also high expectations for PGC Northern Lights (True North son), a ¾ brother to BCC Rapport and Sitz Polaris. And, they are eagerly awaiting the first progeny of Circle L Baron (Armstrong son), selected by Peterson Grain & Cattle and Dana & Lisa Darlington in the 2025 sale.

Since 2019, Circle L Angus has been exhibiting cattle at the National Western Stock Show in Denver, Colorado, where they found success in the Pen of 3 Show as well as marketing elite females-topping the Foundation Angus Female Sale in 2022.

In 2023, the Lameys took a leap of faith and purchased a base ranch in the Horse Prairie Valley, saddled between Clark Canyon Reservoir and Grant, Montana. After leasing for many years, this is surely a blessing and a dream come true.

The entire family invites you to head on down the Angus Tour trail and view some great cattle and meet new friends here in the great State of Montana!

### **Toyne Angus**

Cody & Amber Toyne  
8 Lively Ln. • Melrose, MT 59743  
codytoyne@gmail.com • (406) 860-9094

I sincerely appreciate you taking the time to attend The Southwest Angus Tour and to read a few words about me.

My name is Cody Toyne, and I'm the owner and operator of Toyne Angus. I grew up on a small ranch in north central Wyoming, and that's where my passion for cattle began. I was very involved in 4-H and FFA, showing and judging livestock and learning how to properly care for animals—those early experiences laid the foundation for everything I do today.

In 2008, I was fortunate enough to purchase my first registered Angus heifer calf and bred heifer from Sitz Angus Ranch. That's when Toyne Angus officially began. Since then, I've worked hard to grow my herd by being extremely selective in my replacement heifers and herd sires.

I believe every cow in my program must meet high standards:

- She must breed back every year,
- Have sound feet and a good udder,
- Possess a good disposition,
- Be a solid mother, and
- Raise a high-quality calf annually.

If she falls short in any of these areas, she doesn't stay in the herd.

Over the past 24 years, I've had the privilege of working as a cattle hoof trimmer for many successful ranches. That work has allowed me to learn from some of the best cattlemen and women across the country. One thing I've learned: if you're willing to ask questions, there's a lot of wisdom to be shared.

In addition to trimming, I've worked hands-on as a ranch hand and manager for both registered and commercial operations. Being the boots on the ground every day makes you truly appreciate the value of high-quality cattle.

My wife Amber, my stepdaughter Winona, and I live in Melrose, Montana, where we are blessed to have a small place to call home. As a family, we're dedicated to raising the best Angus cattle we can.

For many years, I sold my bulls via private treaty. But in 2022, I joined the South Montana Angus Association (SMTAA) Bull Sale, where I'm proud to stand alongside other top-quality registered breeders. Together, we offer 80 of the best bulls from our herds each March at the Montana Livestock Auction in Ramsey, MT.

In addition to bulls, we also offer select registered and commercial heifer calves. Thank you again for your time, interest, and support.

### **Reminisce Angus**

Bryan & Marcia Mussard  
6101 Sweetwater Rd. • Dillon, MT 59725  
bryanmussard406@gmail.com • (406) 925-1416  
www.RemAngus.com

Our story started in 1984 when Bryan bought his first registered cows from Schultz Angus. He added cows from Jolly Roger, Sitz and Vermilion Ranches and the rest is history. Our name, Reminisce is about Reminiscing the good old days; a time when things were a little slower; breeding Angus cattle for the reasons they became the most popular breed on the planet, calving ease, milk and marbling.

We have been involved in every sector of the cattle and beef business in a small and large-scale operation. We understand the margin challenges between the different segments and respect them. We run 600 registered Angus cows.

We calve in June, keep our bulls over as long yearlings and sell 180 head annually in our production sale in March. They summer for 3-4 months in big, steep, high mountain pastures. They are developed on a 41 MEGA CAL ration, they are ultra-sounded for carcass traits and they have complete DNA data on them. We sell 300-500 bred heifers annually as well.

Our customer base is loyal for 2 reasons. First, we have a great product, our bulls. They are developed for longevity, and they endure tough times on rugged ranches. The 2nd reason is our unmatched customer service. We have been providing feedlot and carcass data to our customers for over 25 years now; empowering them on their sale day with a Measurable Difference in Angus genetics.

Today we have expanded our ranch into the beef business to pull more value through the system to our customers. It can be done if you stick with it long enough to learn that profitability is beyond boxed beef. It has been a financially painful journey, but we are building a brand that will reward every customer we can work with.

Our Reminisce Ranch involves two of our grown children and their families part time. They are also our customers as they have started their own commercial ranches and buy bulls from us as well. Like 100% of our customers, they too work outside jobs to pay the bills so they can continue to live on their ranches, raise their kids in rural Montana and carry on the Reminisce tradition with their families.

We have taken it upon ourselves to preserve the west the best way we know how and that is helping our hard-working customers preserve their ranches in their communities across several western states.

We take care of our 600 registered cows and approximately 8,000 customer cattle over the winter each year. The other 8 members of our crew also wear a lot of hats at Reminisce Angus Ranch.

## Breeding Angus for the Grasslands of America

**Functional Fertility:** I recently read articles in two publications concerning why there is a trend for so many open cows. All they talked about was body condition of the cows and if they were not a 5-6, you need to change your inputs and feed more high input supplement feed so those cows will breed. Same ranch, same program that your dad and granddad have been working for 80 years. Again, you have to change. Not once did they say that extreme EPD's, terminal growth, the race for the most created cows too big for your ranch environment. Example: \$Beef EPD is geared towards calves with a terminal end point and NO replacements retained. The higher the \$Beef EPD, the more TERMINAL. When you have maxed out the efficient maternal 1200-1300lb range cow, the only way to increase weaning weights is to increase cow size. Bigger cows = bigger calves = bigger weaning weights. And therein lies the problem for bigger cows - they take more inputs to function. Not one time did they mention that synchronizations and drugs to make them cycle to get bred has taken the natural sort out of Mother Nature to show which cows can cycle on low inputs and get bred without Dr. Drug, without the high supplement input environment. The Angus breed has become a race for numbers and most Angus breeders have forgotten about the importance of maternal functional size for the grassland ranchers. Remember - in the American Angus Association, environment is never figured into the numbers.

At Cole Creek Angus, we breed for low input Angus genetics. The 1200-1300lbs cow wintered on hay and straw when the snow covers the grass, and only grass the rest of the time. We breed for feet, fertility, and function in range cows that can travel and still turn grass into dollars.

The race of the number breeders to be number one have turned feet, fertility, and function into the "F" words of the Angus breed. Be careful of your selections as a grassland rancher or you'll be adding another "F" word of your own to go along with these failed traits.

*Because I have to pay for land selling calves, I have to be a low input, least cost producer focused on profit.  
That means smaller cows, more of them, producing more pounds per acre, sold at a higher price per pound.  
Smaller pastures, grazing longer, feeding less. Calving later with more live calves, fewer cull cows, fewer replacements  
And it means using my own bulls.*

# AM I FULL OF CRAP?

Calf scours are not inevitable. A strong prevention program is non-negotiable. Dependable scour prevention is essential for calf welfare, employee morale and business profitability. The immune system's response to vaccination is variable and unpredictable. That's why giving preformed antibodies instead of relying on a vaccine to stimulate antibody production is so important. I'm all for removing uncertainties. So yes, I stand by this product. (And no, I'm not.)
